HERITAGE NUMISMATIC AUCTIONS INC.

Prices Realized The 1991 Chicago Sale

Heritage Numismatic Auctions, Inc.

Heritage Plaza

100 Highland Park Village

Dallas, Texas 75205-2788

214-528-3500, WATS: 1-800-US COINS (872-6467)

Dear Fellow Numismatist:

Our Chicago Bullet Sale was well attended with collector material receiving increased demand:

5043	1852	3 Cent Silver	NGC	MS66	\$ 2,700
5046	1858 II	3 Cent Silver	NGC	MS65	\$ 4,750
5218	1853	Arrows & Rays	PCGS	MS63	\$ 3,100
5275	1883S	Morgan Dollar	PCGS	MS65	\$ 24,000
5312	1905	Lewis & Clark	PCGS	MS64	\$ 5,200
5327	1880 III	\$1 Gold	PCGS	MS67	\$ 6,500
5328	1884 III	\$1 Gold	PCGS	PR65	\$ 10,000
5434	1877	\$10 Lib	PCGS	EF45	\$ 7,000

Although many coins are selling for fractions of their recent highs, collector material continues to do quite well. Chicago showed that the collector is still the foundation and backbone of the industry. If you have material to consign to an upcoming sale, check out our auction schedule:

1991		
September 27	Cherry Hill, NJ	Bullet
October 10	Long Beach, CA	Bullet
November 1	Tampa, FL	Bullet
December 12-14	Dallas, TX	Signature

1992		
January 3	Atlanta, GA	Bullet
February 7	Long Beach, CA	Bullet
Early Spring ANA		
February 27-29	Dallas, TX	Signature
April 3	Tampa, FL	Bullet

We are also pleased to be the auctioneer for the 1992 ANA Convention to be held in Orlando, Florida August 11-16.

Sincerely,

Leo Frese
Consignment Coordinator

Bullet Auction

Held in conjunction with

The August 1991 Chicago Show

Sunday, August 11, 5:30 P.M. C.D.T.

Specially Prepared for

Charles D. Moore

Bullet Auction

Dear Charles D. Moore:

The entire numismatic community is gearing up for Chicago. What a birthday bash it will be for the ANA. An entire week of celebration for this 100 year old organization and a week sure to be remembered for years to come. Happy birthday, ANA!

The numismatic market will preparing for the ANA the way it knows best. On the Thursday prior to the big convention, hundreds of dealers, collectors, and investors will be attending the Chicago show at the Ramada O'Hare. It will be at this show where Heritage will be conducting lot viewing for a special Bullet Sale to be held the evening of Sunday, August 11. We look forward to seeing many of you there. In total there are 650 lots having a value of approximately \$1 million. Don't pass up this opportunity to pick up some numismatic treasures at a fraction of their former value.

Among the highlights of this sale are:

1804	1/2c	PCGS	MS64 R1ED
1853	3 Cent Silver	ANACS	MS67
1854 II	3 Cent Silver	NGC	MS66
1858 II	3 Cent Silver	NGC	MS65
1796	Early 10c	PCGS	MS62
1807	Bust 10c	PCGS	MS63
1831	Bust 25c	NGC	MS65
1796	Early 50c	PCGS	VF25
1853	Arrows & Rays 50c	PCGS	MS63
1855-S	Arrows 50c	NGC	MS61
1894-O	Barber Half	NGC	MS66
1882	Trade Dollar	NGC	PR67
1880	Morgan Dollar	PCGS	PR66
1883-S	Morgan Dollar	PCGS	MS65
1880	Gold Dollar	PCGS	MS67
1911-D	\$2 1/2 Indian	PCGS	MS64
1849	\$10 Liberty	NGC	MS63
1907	High Relief	PCGS	MS65
1927-S	\$20 Saint	PCGS	MS60
1849	Norris Gregg Norris \$5	PCGS	VF35

As you look through the catalog and see lots which interest you, make a note of them and give your Heritage representative a call. They will be happy to describe them further.

Thank you,

Leo Frese
Consignment Coordinator
Heritage Numismatic Auctions, Inc.

P.S. As a special reminder, please note the change in terms with regards to phone bidding. A lot must be worth at least \$500 in order to bid by phone.

Pick One of Four Easy Ways to Bid in the Bullet Sale

Now, it's easier than ever to get the coins you want at the Heritage Bullet Sale. You can attend the sale in person at the August 1991 Chicago Show (Sunday, August 11, 1991, at 5:30 P.M. C.D.T.) or, you can place your bid by mail, FAX, or phone. It's easy...

#1 Bid In Person!

#2 Bid By Mail! Prior to the sale, you can bid on the coins you want by mail. Simply complete the enclosed Bid Sheet with your bids on the coins you want and send it in. If yours is the high bid on any lot, we act as your representative at the sale. Also, don't forget to use CompuBid to help you manage your coin buying budget. For more information, please refer to the following pages on "Mail Bidding" and "CompuBid."

#3 Bid By FAX! You can also submit your bids by FAX. Just follow the instructions for completing your mail bid, but this time FAX it! To FAX your Bid Sheet, call the Heritage FAX Hotline: (214)520-6968! FAX bids will be accepted until 1:00 p.m. on Friday, August 9, 1991, before the sale begins! Please see the section "Heritage FAX Hotline" for more information.

#4 Bid By Phone! Call 1-800-US-COINS! For even faster service, you can place your bids directly by phone. Call 1-800-US-COINS and tell us your bids on the coins you want. Phone bids before the sale will be accepted until 1:00 p.m., Friday, August 9, 1991.

NEW SERVICE: Bid By Phone During The Sale ON COINS \$500 OR MORE! You can actually participate in the auction itself by phone! Your Heritage agent bids for you LIVE! on the bidding floor, according to your telephone instructions! It's just as if you were there in person! See the column at right for details.

You Can Receive Your Coins In Less Than A Week!

As soon as we receive your payment, your coins will be shipped OVERNIGHT FEDERAL EXPRESS, so they'll be in your hands the very next day! If you act promptly, you can get your coins within the week...

Sunday, August 11: You're the successful bidder on the coins you want.

Tuesday, August 13: You receive a Western Union Mailgram itemizing your purchases, your winning bids, and the total amount due. If you respond with your payment immediately via overnight express, your coins can be in your hands by Tuesday!

Wednesday, August 14: Your payment MUST be postmarked on or before this date. As soon as we receive your check, your coins will be shipped over-night Federal Express, so they'll be in your hands the very next day!

How to Bid By Phone. It's Fast! It's Fun! In Five Easy Steps!

No travel. No hassle. You can sit at home and bid on the coins you want valued over \$500 just as if you're in the heat of the auction action! Your Heritage representative calls you and acts as your agent on the bidding floor. It's just as if you were there in person! Here's how...

Step One: Choose Your Coins. Look through the catalog and pick out the coins you want to bid on in the sale with a value over \$500.

Step Two: Let Us Know. Use the Mail/FAX Bid Sheet enclosed to write down the lot numbers of the coins you've selected to bid on. Then, send it to us by mail or FAX (214-520-6968). OR YOU CAN GIVE US THIS INFORMATION OVER THE TELEPHONE BY CALLING 1-800-US-COINS. For you to participate by telephone in this sale, WE MUST HEAR FROM YOU NO LATER THAN Friday, August 9.

Step Three: Be Prepared. Make a list of the lot numbers you want to bid on and the top bid you want to place on each lot. Be ready by the phone to take the call from your Heritage representative. He or she will call you just before the lots you want are up for bidding. The auction will begin promptly at 5:21 p.m., Sunday, August 11. Lots are sold in ascending numerical order at the rate of about 200 lots per hour, so you can estimate when your representative will be calling. REMEMBER: A LIVE AUCTION CAN MOVE VERY QUICKLY. A LOT CAN SELL IN LESS THAN 5 SECONDS. SO IT'S VERY IMPORTANT FOR YOU TO BE READY BY THE PHONE! TAKE THE CALL WHEN IT COMES.

Step Four: We Call You. When your Heritage agent calls, he or she will, for your bid on the lot you wish to buy and keep you informed as the bidding progresses. You are in control. Your Heritage agent will bid only according to your instructions.

Step Five: We Have A Winner! You will know immediately if yours is the winning bid. As soon as the auctioneer declares the lot sold, your Heritage agent will relay the news to you. It's that easy!

Mail Bidding At Auction

Mail bidding at auction is both fun and easy and only requires few simple steps.

1. Look through the catalog, and determine the lots in which you have interest.
2. Research the market value of these lots by checking price lists and other price guidelines.
3. Fill out your bid sheet, entering your maximum bid on each lot using your price research and your desire to own the lot (most coins auctioned are one-of-a-kind, or rare of special quality not formally found).

WHEN BIDDING BY MAIL, YOU FREQUENTLY PURCHASE AT LESS THAN YOUR MAXIMUM BID. Here is how a mail bid is recorded by our auctioneer:

Bids are recorded as they are received. Preference is given to the first bid received in case of a tie.

On the floor of the auction, bidding is opened at 5 to 10% above the second highest mail bid. This bid is submitted by our company acting on your behalf as the highest mail bidder. If the auctioneer recognizes no other bids from the floor, you are awarded the lot at the opening bid. If bidding proceeds from the floor, the company acting as your agent, registers bids in 5 to 10% increments over the previous bid. This process is continued until you are awarded the lot, or until the next bid is high or equal to your maximum bid.

An example of this procedure is set forth under these conditions:

On lot 25, you submit a bid of \$1,000, and the second highest mail bid is at \$500. In this case, bidding on the floor starts at \$550, and is bid by our company on your behalf. If no other bids do come from the floor, we bid for you in 5-20% increments set by the auctioneer, until we reach your maximum bid of \$1,000. If bidding has passed or equaled your maximum, we take no other action, and the bidding continues on the floor until the final bidder has been recognized by the auctioneer.

CompuBidTM gives you more “on_the_scene” bidding clout than you ever had before.

CompuBidTM is a people-to-people innovation that is, by far, the most advanced and helpful method of mail bidding available in the rare coin marketplace. No other auction company has anything that even compares with its simple sophistication and direct benefits to you.

It increases your chances of success.

CompuBidTM increases your chances of success over our standard mail bidding system and other conventional mail bidding systems two ways: it increases your chances of bidding on more coins; it increases your chances of buying more of the coins you want.

It puts you where the action is.

The action is at the auction. And CompuBidTM puts you there. It gives you almost all the advantages of the people attending the auction. In fact, CompuBidTM gives you so much flexibility, it's as if you were attending the auction in person.

It maximizes your bidding dollars.

CompuBidTM enables you to bid on as many coins as you like, yet limit your total purchases to a specific amount. For example, you could bid on \$25,000 worth of coins, yet limit your total purchases to \$5,000. In this example, although you have the opportunity to bid on several coins that interest you, it is still possible to stay within your buying limits. This way, knowing that you have limited your bidding dollars to a specific amount, you can bid with more confidence and flexibility than ever before.

It evens the odds for you.

CompuBidTM equalizes your chances of bidding successfully against the bidders at the auction on the coins you want to buy. For example, assume you want to buy either a Seated dime for \$500 or a Seated quarter for \$950. You would bid on both coins in those amounts and place your bidding limit at \$950. If you bought the Seated dime for \$500, your bidding limit would be reduced to \$450 ($\$950 - \$500 = \450), which would be your new bid on the Seated quarter. However, if you did not buy the dime, then your bid of \$950 on the quarter would be accepted.

In another example, suppose you wanted to buy one gem proof Mercury dime \$500. Assume there are three similar quality proof dimes in the sale, all with the same date and grade. You would bid \$500 on all three and limit your purchase to \$500. You would buy the first one to sell for \$500 (or less) and the other bids would be canceled.

It's a tested and proven success.

CompuBidTM has proven to be the most effective and useful auction mail bidding technique available. No other auction company has the advancements in mail bidding technology and documentation necessary to offer a service as important and historically significant as CompuBidTM. In fact, CompuBidTM is so precise that Heritage Numismatic Auctions, Inc., unconditionally guarantees that you, the bidder, will not be liable for any purchase over your specified limit.

Terms and Conditions of Sale

1. This is a public auction and mail-bid sale held by Heritage Numismatic Auctions, Inc., a licensed and bonded auctioneer (the "Auctioneer"). **Although the Auctioneer may not withdraw any lot after a call for bids has been made with respect to that lot, the consignee of the property included in the lot may bid on and purchase the lot at the auction sale for his own account.** Notice of the consignee's liberty to bid is hereby made in accordance with Article 2 of the Texas Uniform Commercial Code. The purchase of a lot by consignee's bid shall obligate such consignee to pay a fee to the Auctioneer.
2. The highest bidder acknowledged by the Auctioneer shall be the buyer. In the event of any dispute between bidders, the Auctioneer may at his sole discretion immediately put the lot up for sale again. The Auctioneer's decision shall be final and binding upon all bidders.
3. A buyer's premium equal to 10% of the successful bid price will be added to each invoice, unless the purchase is made by a consignee's bid on the consignee's property in which case a different fee is charged as a Consignor than as a Buyer. The premium and/or the fee are payable by the buyer as part of the total purchase price.
4. All bids are to be per lot as numbered in this catalog, and no lots will be broken. The Auctioneer reserves the right to group two or more lots together and to withdraw, prior to a call for bids, any lot or lots from the sale. Bids will be accepted in whole dollar amounts only.
5. All sales are strictly for cash in United States dollars (no credit cards accepted) and are due and payable immediately upon receipt of the auction invoice or notice, or if payment is to be made at the auction sale, simultaneously with receipt of the coins. For mail/FAX/phone bidders, payment for your lots must be postmarked or sent Federal Express on or before Tuesday, August 13. The Auctioneer reserves the right to void a sale if payment in full of the invoice or notice is not properly mailed or sent as above, or is not received by the Auctioneer within 13 days after the date of the sale.
Successful floor bidders must pay for lots by 12:00 noon C.D.T., August 12, 1991. Lots delivered in the State of Texas and Illinois are subject to all applicable state and local taxes, unless appropriate permits are on file with us. Shipping, handling, and insurance charges will be added to invoices for lots delivered by mail. Overseas buyers must furnish their own insurance during shipment.
6. All successful mail/FAX/phone bidders will be notified by telephone or Western Union Mailgram on Tuesday, August 13. If the auction invoice(s) or notice of successful bids submitted by the Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law until paid, and if the Auctioneer refers the invoice(s) to an attorney for collection, the buyer agrees to pay attorneys' fees, court costs, and other collection costs incurred by the Auctioneer. The courts of Dallas County, Texas, shall have exclusive jurisdiction and venue over any suit initiated by the Auctioneer to collect delinquent invoice(s), and all bidders consent to in personam jurisdiction of the State of Texas.
7. Mail bidders who have not previously established credit must furnish satisfactory references well in advance of the sale date, or send a deposit of 25% of their bids which is applicable to purchases. Any portion of such deposit not used will be promptly refunded after the sale.
8. All bidders who have mailing addresses outside the United States of America, the Territories of the USA, Canada or Mexico, or have addresses through the U.S. Military, must deposit with the Auctioneer 25% of the total amount bid in United States dollars. Any portion of such deposit not used will be promptly refunded after the sale. Also, persons who have APO or FPO box numbers must deposit 25%.
9. The Auctioneer reserves the right to require payment in full before delivery of the merchandise to the buyer. **Bidder personally guarantees payment of all successful bids, and if a corporation, an officer or principal in the corporation agrees to personally guarantee such payment.** Title shall not pass to the successful bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the coins once they are in his possession. Risk of loss shall be borne by the buyer following shipment of the coins.
10. The Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid which, in his opinion, is not submitted in "Good Faith," or as the case dictates, is not supported by satisfactory credit references, as the Auctioneer in its sole discretion shall determine. A bid is not considered made in "Good Faith" when it is made by an insolvent or irresponsible person or a person under the age of eighteen, as the Auctioneer, in its sole discretion, shall determine. In the event a successful bidder fails to pay all amounts due, the Auctioneer reserves the right to resell the merchandise and the buyer agrees to pay for the reasonable cost of such a sale, including a 10% seller's commission, and also to pay any difference between the resale price and the price of his previously successful bid.
11. The Auctioneer shall have a lien against the merchandise purchased by the buyer, and any other property of the buyer then held by the Auctioneer to secure payment of the auction invoice(s) and any other amounts due the Auctioneer from the buyer, with respect to which the Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code. In addition, with respect to payment of the auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignee of the merchandise included on the invoice.
12. The Auctioneer shall have the right to offset the unpaid amount of any auction invoice(s) against any amount then due to the buyer by the Auctioneer or affiliates of the Auctioneer.
13. No buy or unlimited bids will be accepted. Mail bidders will be awarded lots at a 5-10% advance over the second highest bid. No additional commission (except for the buyer's premium) is charged for executing mail, phone, or FAX bids.
14. The Auctioneer cannot be responsible for your errors in bidding, so check your bids carefully. When identical mail or FAX bids are submitted, preference is given to the first received. If a mail bidder and a floor bidder have submitted identical bids, the decision of the Auctioneer and declaration of the winning bidder is final. The Auctioneer is not responsible for executing mail bids received on or after the day the first lot is sold. To insure the greatest accuracy, your bids should be entered on the standard bid sheet form and be received at the Auctioneer's place of business at least two business days in advance of the sale date.
15. Estimates will be given upon written request. It is recommended that bidders approach or exceed the estimates in order to increase the chances of bidding successfully.
16. By bidding at this sale the bidder warrants that he is of legal age, has the capacity to make the bid presented, and that the transaction is not for commercial purposes.
17. **Notice as to Warranties.** Auctioneer is selling only such right or title to the coins being sold as Auctioneer may have by virtue of consignment agreements on the date of sale and disclaims any warranty of title to the coins. Any description of the coins contained in this catalog is for the sole purpose of identifying the coins, and no description of coins has been made part of the basis of the bargain or has created an express warranty that the goods would conform to any description made by the Auctioneer. Auctioneer disclaims any warranty of merchantability or fitness for any particular purpose; the coins are sold "As Is" without any express or implied warranty.

Coins sold referencing a third-party grading service may have various warranties and the bidder is referred to those services for details. American Numismatic Association Certification Service (ANACS), 818 N. Cascade Ave., Colorado Springs, CO 80903-3279; Hallmark Grading Service, Inc., P.O. Box 2879, Woburn MA 01888;

Numismatic Certification Institute, Inc., Heritage Plaza, Highland Park Village, Dallas, Texas 75205-2788; Numismatic Guaranty Corporation (NGC), P. O. Box 1776, Parsippany, NJ 07054; Professional Coin Grading Service (PCGS), 4533 MacArthur, Suite D, Newport Beach, CA 92660.

AS THE COINS ARE SOLD BY REFERENCE TO THIRD PARTY SERVICE'S CRITERIA AND DETERMINATION, ALL SALES ARE FINAL AND THERE IS NOT A RIGHT OF RETURN FOR ANY REASON EXCEPT AUTHENTICITY. ALL COINS ARE GUARANTEED AS GENUINE BUT ARE NOT GUARANTEED AS TO GRADE.

Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any property by Auctioneer to bidder.

No third-party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the bidder and may not be assigned.

Any statement made by the Auctioneer is a statement of opinion and does not constitute a warranty or representation.

An employee of Auctioneer may not alter the Terms of Sale, and, unless signed by a principal of Auctioneer, any alteration is null and void.

This sale is not on approval.

- 18. Important Notice About Grading.** Grading is an art, not a science, and therefore the opinion of others (including trained experts), and the same expert may not grade the same coin with the same grade at two different times. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of ANACS, Hallmark, IBS, NCI, NGC, PCGS, or any other grading service at any time in the future. Due to changing grading standards over time and to possible mishandling of coins by subsequent owners, the Auctioneer reserves the right to grade coins differently than shown on certificates from any grading service that accompany the coins. For the same reason as stated above, the Auctioneer reserves the right to grade coins differently than the grades shown in the catalog should such coins be recognized to any future auction.

Although consensus grading is employed by grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a coin was broken out of a plastic holder and was resubmitted to another grading service or even the same service, the coin could come back a different grade.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.

The degree of liquidity for certified coins will vary according to general market conditions and the particular coin involved. For some coins there may be no active market at all at certain points in time.

19. Some of the coins in this sale may have been graded by the Numismatic Certification Institute (NCI, an affiliate of the Auctioneer).

Important Note -- The grading standards used by NCI generally result in a coin receiving a higher grade than the "consensus" grade that would be assigned by most dealers. The grading standards reflected in the Coin Dealer Newsletter (CDN) are stricter than NCI's and, accordingly, CDN prices in general significantly overstate the wholesale value of NCI graded coins. The Certified Coin Dealer Newsletter (CCDN), P.O. Box 11099, Torrance, CA 90510 is a better wholesale reference for NCI certified coins than the CDN.

20. Any dispute after the settlement date, August 26, 1991, is strictly between the bidder and consignor without involvement or responsibility of the Auctioneer.

The Auctioneer or affiliates of the Auctioneer, may consign items to be sold in this auction sale and may bid on those items or any others in the sale. The Auctioneer or affiliates expressly reserve the right on its lots to modify its bids at any time based upon data made known to the Auctioneer or its affiliates. In the event of a typographical error or attribution error, the Auction may, at the Auctioneer's sole discretion, correct the error orally at the sale, or, if discovered at a later date, to refund the buyer's money without further obligation. Under no circumstances shall the obligation of the Auctioneer to any bidder be in excess of the buyer's premium for any lot in dispute. If any disputes arise regarding payment, authenticity, or grading between the bidder and Auctioneer, the Auctioneer, at its sole discretion, may submit the disputed matter to binding arbitration in accordance with the rules of the Professional Numismatists Guild, to which the bidder, by placing a bid and thereby accepting these Terms and Conditions of Sale, agrees to be bound.

21. In consideration of participation in the auction and the placing of a bid, a bidder expressly releases Auctioneer, its affiliates, the Consignor, or Owner of the Lot from any and all claim, cause of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned grade or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Sale or otherwise, except as specifically declared herein; e.g., authenticity, typographical error, etc., and as to those matters, the rights and privileges conferred therein are strictly construed and exclusive remedy and shall be waived by Purchasers by noncompliance to its express terms.

The August 1991 Chicago Bullet Auction

Specially Prepared for
Charles D. Moore

A 10% Buyer's Premium is added to the Hammer Price on each lot.

There are Special Payment requirements for this Bullet Sale. Before you bid, please read Terms and Conditions of Sale, Section 5.

All certified coins are designated by the initials of the certification company listed before the grade.

HALF-CENTS

- 5001 PCGS 1804 MS 64 Red. B-10. R.1. Plain 4. Stemless Wreath. Although a common variety of the year, no copper coin from the early 19th century may be termed common with the original mint color still intact. In fact, this is the only 1804 PCGS has graded with full red color. The coin has strongly detailed features with sharp, individual hair curls and good leaf detail. Clean surfaces with only the most trivial marks present. An excellent opportunity to acquire this type in such superior condition.
- 5002 PCGS 1826 MS 63 Brown. An exceptionally attractive coin for the grade with bright, glossy surfaces and a sharp strike.
- 5003 PCGS 1853 MS 65 Brown. Smooth, virtually unblemished surfaces with even chocolate brown color. A lovely brown half cent.
- 5004 PCGS 1853 MS 64 Red and Brown. Fully struck with deep tobacco brown color over most of the surfaces with the devices outlined in original red luster.
- 5005 PCGS 1855 MS 62 Red and Brown. Well struck with deep brown in the fields accented by significant portions of red around the devices. Lightly marked with a few tiny planchet flakes.
- 5006 PCGS 1857 MS 63 Brown. Well struck with even brown color on both sides.

LARGE CENTS

- 5007 PCGS 1794 VF 20. S-65. R.1. The "Shielded Hair" variety. Deeper chocolate brown color in the fields offset by a lighter, almost tan on the devices. Each side has a minor planchet flaw.
- 5008 PCGS 1816 MS 63 Red and Brown. An original coin with attractive light brown and tan color with suggestions of red underneath. Somewhat irregularly struck with light abrasions on each side.
- 5009 PCGS 1820 MS 64 Brown. Fully and deeply struck in the centers with a bit of mild iridescence underlying the light brown patina. Obviously a Randall Hoard coin with the ubiquitous die crack encircling the stars on the obverse.
- 5010 PCGS 1839 Type of 1840 AU 58. Sharply struck in the centers with medium brown color and a couple of small flecks of carbon on the obverse.
- 5011 NGC 1851 MS 65 Red and Brown. Bright, glossy brown surfaces with traces of underlying red still to be seen.
- 5012 PCGS 1854 MS 64 Red. A very pleasing Large cent with bright, original red color and a sharp strike to match.

FLYING EAGLE CENTS

- 5013 Hallmark 1858 Small Letters MS 64 PQ. Lustrous golden-tan surfaces that are unspotted and nearly

blemish-free. A true upper-end, premium quality coin.

INDIAN CENTS

- 5014 PCGS 1867 MS 64 Red. Fully struck with even red color. A very scarce coin with the original color intact. Only ten other coins have been so graded by PCGS.
- 5015 PCGS 1869 MS 64 Red. Strongly struck with attractive red luster. One of only eight coins to have been so graded.
- 5016 PCGS 1872 MS 63 Red and Brown. Bright orange and red colored luster.
- 5017 PCGS 1874 MS 63 Red and Brown. Fully struck with a touch of brown on each side with much underlying red.
- 5018 PCGS 1908 MS 65 Red. Fully struck with bright, dazzling mint luster.
- 5019 Hallmark 1908-S MS 65 90% Red. A clean and overall pleasing example of this scarce mintmarked Indian cent.
- 5020 PCGS 1860 PR 63. A scarce copper-nickel proof with deep, flashy mirrors in the fields and rich reddish color.
- 5021 PCGS 1891 PR 64 Red. A lovely coin with bright fields and variegated orange and cherry red color.
- 5022 NGC 1902 PR 66 Red and Brown. Iridescently toned.
- 5023 PCGS 1907 PR 65 Red and Brown. Reflective fields with little brown to be seen.

LINCOLN CENTS

- 5024 PCGS 1909-S V.D.B. MS 64 Red. Good original color with a few tiny flecks of carbon.
- 5025 PCGS 1911-D MS 64 Red. Excellent color with the trace of a thumbprint on the obverse that accounts for the 64 grade.
- 5026 PCGS 1912-S MS 63 Red and Brown. Well struck with fiery mint luster, just a few abrasions.
- 5027 ANACS 1917-S MS 64 Red and Brown. Sharply struck with only the slightest mellowing of the original red color.
- 5028 PCGS 1919-S MS 64 Red. A sharply struck example of this scarce mintmarked Lincoln cent.
- 5029 NGC 1921-S MS 64 Brown. Fully struck with underlying reddish color.
- 5030 PCGS 1924-D MS 64 Red and Brown. An attractive example of this scarce, semi-key issue with muted iridescent fields and a slight softness of strike that accounts for the grade.
- 5031 NGC Five 1943-S MS 67. Dazzling mint brilliance. (Total: 5 coins)
- 5032 PCGS 1972-72 Doubled Die MS 65 Red. Even deep red color.
- 5033 PCGS 1972-72 Doubled Die MS 65 Red. Superb original color.
- 5034 PCGS 1909 PR 64 Red. An unusually attractive matte proof with bright orange-red color with occasional spots and streaks of iridescence, especially on the reverse.
- 5035 PCGS 1911 PR 64 Brown. For a brown coin the surfaces display an amazing amount of iridescent coloration beneath the predominantly brown patina.
- 5036 PCGS 1911 PR 65 Red and Brown. Lustrous reddish-brown surfaces that are clean and spot-free.

The August 1991 Chicago Bullet Auction

Specially Prepared for

Charles D. Moore

5037 NGC 1937 PR 66 Red; 1939 PR 66 Red; and a 1940 PR 66 Red. The start of a high end set of these scarce early proofs. (Total: 3 coins)

TWO-CENT PIECES

5038 PCGS 1864 MS 64 Red. Fully struck with attractive red color. A great value.

5039 PCGS 1865 MS 64 Red and Brown. Lustrous red fields with light brown on the devices. A nice looking type coin and a good value at today's levels.

5040 PCGS 1867 MS 64 Red. Fully struck with even color on both sides. One of 13 so graded.

THREE-CENT SILVER

5041 PCGS 1851-O AU 55. Fully struck with pale aqua blue over the semi-prooflike fields. This is the only mintmarked three-cent silver.

5042 NGC 1852 MS 64. Untoned with excellent mint frost. Diagonal roller marks in the center of each side prevent a higher grade.

5043 NGC 1852 MS 66. One of the loveliest three-cent silver pieces we have seen in recent memory. The surfaces are flawless and covered with a light iridescent patina that is strong in reds and greens. The strike is especially strong with sharp details in the centers and only occasional weakness noted on the stars around the edge of the reverse. One of only five coins to have been so graded by NGC. PCGS has only certified ten.

5044 ANACS 1853 MS 67. Three-cent silver pieces were the only denomination U.S. coin that contained silver that readily circulated in the early 1850s. The other denominations were hoarded, exported, and melted as their intrinsic value was greater than their face value. Not so with the silver copper alloyed three-cent silver, and these coins were heavily circulated throughout the country, thus explaining their rarity in the upper reaches of mint state. While no statistical data is available from ANACS on the number of coins certified, we do know that PCGS has only graded two pieces in MS-67 of this type. NGC none. The surfaces are immaculate and exude originality. They are toned, but mostly around the edges while the centers still retain the original fiery mint luster just as it was in 1853. The strike is fully brought up in the center with only a couple of stars showing any weakness on the radials. We would speculate that this may have been one of the first coins struck from this die pair as there is no evidence of clashing as is usually seen on these coins.

5045 NGC 1854 Type Two MS 66. First year of the scarce Type Two design that was only minted through 1858. Because of the limited number of years these coins were minted, the Type Twos have proved to be an excellent long-term hold for both collectors and investors over the years. Like the 1853 above, this piece does not show any evidence of the usually ubiquitous die clash marks. There is, however, a pronounced die crack running inward from the 3 o'clock position on the obverse rim that would indicate the limited usefulness of this die pairing. The surfaces are clean and highly lustrous, the original mint frost still evident through the deep layers of multi-colored iridescent toning. The strike is strong in the centers with weakness noted on the reverse stars as usual. This is the only coin of this date to have been so graded by NGC. PCGS has not certified any.

5046 NGC 1858 Type Two MS 65. An originally toned coin with beautiful concentric rings of rainbow color on each side. Also sharply struck with excellent mint luster and showing no noticeable field marks on either side. A lovely

gem example of this rare, short-lived type and one of only 14 pieces to have been so graded by NGC. PCGS has only certified six.

5047 PCGS 1861 MS 63. Sharply struck and untoned with bright, lustrous fields.

5048 NGC 1861 MS 64. Lustrous and well struck with a touch of light brown color.

THREE-CENT NICKELS

5049 PCGS 1866 MS 64. Nicely toned.

5050 PCGS 1868 MS 63. Lustrous.

5051 PCGS 1871 MS 63. Sharply struck and untoned.

5052 NGC 1866 PR 64. Light in color. A scarce early proof.

5053 PCGS 1879 PR 64. Lightly toned and close to 65, kept back by a planchet flaw above the head of Liberty.

5054 PCGS 1884 PR 64. Lightly toned.

5055 PCGS 1885 PR 63.

5056 PCGS 1888 PR 65. Brilliant with a cameo obverse.

5057 NGC 1888 PR 65. Lightly toned and essentially flawless.

SHIELD NICKELS

5058 PCGS 1866 Rays MS 64. Sharply struck with satiny luster, held back from a higher grade by the presence of a couple of small planchet flakes and die cracks on the reverse.

5059 PCGS 1867 Rays MS 63. Sharply struck with a toned reverse.

5060 PCGS 1876 MS 64. Light in color and well struck with a die crack and planchet flake on the obverse.

5061 PCGS 1882 MS 64. An original coin that is sharply struck and lightly toned.

5062 ANACS 1866 Rays PR 65. Rays nickels in proof are one of the rarest and mostly eagerly sought out of all 19th century proof types. Proofs are identifiable by the plain center dots on each side. These dots are not seen on any known business strikes and are certainly obvious on this coin. The original mintage figure of 125 was reckoned by Breen is based on the number of silver proof sets delivered. This estimate appears to be in error; however, as 255 proofs of this date have been certified by both PCGS and NGC. So, we would assume that an unrecorded number of proofs were struck in addition to those included in the silver sets. This piece is mostly untoned with clean, problem-free surfaces. The striking details and depth of mirrors are both somewhat less than we have seen on other proofs of this date, leading us to speculate that this may have been a singly struck proof. Nonetheless, a rare and desirable type coin, especially in gem condition.

5063 PCGS 1881 PR 64. Deeply reflective and light in color overall. A popular date as a proof because of the scarcity of business strikes.

5064 PCGS 1882 PR 65. Reflective, mirror-like fields with a light layer of reddish toning. Sharp, problem-free coin.

LIBERTY NICKELS

5065 PCGS 1883 With Cents MS 64. Untoned and softly struck

The August 1991 Chicago Bullet Auction

around the edges.

5066 PCGS 1892 MS 63. Lustrous.

5067 PCGS 1893 MS 63. Lustrous and lightly toned.

5068 NGC 1893 MS 64. Super lustrous with light toning.

5069 PCGS 1905 MS 64. Good luster with light iridescence on the reverse.

5070 PCGS 1910 MS 63. Toned.

5071 PCGS 1912-D MS 64. Medium gray and olive toning with a somewhat irregular strike.

5072 PCGS 1912-S MS 64. A bit weakly struck as usual, otherwise lustrous with streaks of golden color.

5073 PCGS 1909 PR 66. Good reflectivity in the fields (such is not always the case on this date) with lightly-toned surfaces.

BUFFALO NICKELS

5074 PCGS 1913 Type One MS 65. Lightly toned with excellent luster.

5075 PCGS 1913 Type One MS 65. Complete, pinpoint detailing with clean surfaces and fragile iridescent toning on the reverse.

5076 PCGS 1913 Type Two MS 64. Fully struck with light golden color. A nice, upper-end coin.

5077 NGC 1913 Type Two MS 65. Lilac toning over both sides with the devices framed in a cinnamon brown.

5078 PCGS 1915 MS 64. Matte-like with a fully brought up strike.

5079 PCGS 1916 MS 64. Fully struck with a hazy layer of gray-olive patina.

5080 PCGS 1916 MS 65. Lustrous and lightly toned. The date and designer's initial were double punched, a "poor man's double die."

5081 NGC 1916 MS 65. Frosted mint luster with lovely lilac and golden toning.

5082 PCGS 1916 MS 66. Fully detailed with immaculate surfaces and lovely lilac and golden toning. Only 11 have been so graded by PCGS.

5083 PCGS 1935-S MS 66. Sharply struck and toned a lovely golden, red, and blue.

5084 PCGS 1915 PR 66. Superb surfaces that have a fine grain matte finish with an attractive overlay of golden-rose toning and lilac accents. Proof Buffalos are an excellent buy at current levels—they are coins with small original mintages, a rather high attrition rate, and are scarce in high grades. According to the July Population Reports from the major grading services, PCGS has only graded 45 proofs of this date in this grade while NGC has certified only 26.

5085 PCGS 1936 Type One PR 65. A lovely Satin Finish proof with light golden-olive toning. A scarce and overlooked proof type.

EARLY HALF DIMES

5086 PCGS 1797 VG 8 V-4. R.4. with die crack at E1. Well worn but light in color, the only detracting feature on the coin being a diagonal scratch running from the second 7 in the date to the L in LIBERTY.

5087 PCGS 1800 EF 40. V-1b. R.3. A well struck coin that does not show any noticeable or distracting surface marks, either made in the Mint or afterward. Toned a deep blue-purple with scattered bits of other colors intermixed, this is quite an attractive early type coin.

5088 PCGS 1831 MS 63. Bright centers with golden-brown at the edges and just a touch of blue.

5089 PCGS 1832 MS 63. Medium golden-yellow toning that is evenly matched on both sides with strong underlying luster. The 5C on the reverse is noticeably repunched.

5090 PCGS 1833 MS 64. Untoned with sparkling mint luster. The dies were apparently polished in the mint as there is a small portion of the lowest curl missing, giving that curl a looped look. An outstanding upper-end mint state type coin. One of only 23 pieces to have been so graded by PCGS.

SEATED HALF DIMES

5091 PCGS 1838-O No Stars VG 10. The No Stars type is usually thought of as a one issue type, but there is another in addition to the 1837, and that is the rare 1838-O. Only 70,000 were minted and few survive today. This issue is prohibitively rare in AU or better. This is an original, uncleaned coin with identifiable features, sharp date and mintmark. The fields are toned while the devices are silvery-gray. An affordable example of this rare date.

5092 NGC 1839 No Drapery MS 63. Fully struck with medium gray toning and light blue and red undertones. A significant type coin that was only struck in three years.

5093 NGC 1839 No Drapery MS 63. Full hair curls and radials on the stars with deep gray and golden-red toning.

5094 PCGS 1842 MS 64. If one were seeking a Stars half dime in this grade the logical choice would be a coin from the mid or late 1850s. However, this much earlier date is available and it carries only a slight date premium. Only thirteen pieces have been so graded by PCGS with three finer. The strike is unusually strong with full head and star details and the coin is originally toned in shades of deep gray-olive that lighten and brighten to a pale crimson at the edges. Light, scattered abrasions on the devices account for the grade but these are only visible with magnification.

5095 PCGS 1852 MS 63. Excellent luster and reasonably well struck for a Stars half dime. Reddish-golden toning.

5096 Hallmark 1853 Arrows MS 61. Fully struck with complete radial details on all the stars and covered by a deep red, olive, and blue toning on both sides. A scarce short-lived type.

5097 NGC 1856 MS 63. A strictly original coin with deep violet, red, and blue toning, just lacking a bit in the strike department.

5098 NGC 1857 MS 63. Weak peripheral details as usual with mottled gray and golden toning.

5099 PCGS 1857 MS 64. Good luster and light in color with a strong strike for the type. A nice Stars half dime.

5100 PCGS 1858 MS 63. Untoned and well struck with a few abrasions in the fields.

5101 NGC 1859 MS 63. Attractively toned but showing some peripheral striking weakness.

5102 NGC 1859-O MS 62. Although not well brought up, the surfaces retain complete mint luster and are attractively toned. An interesting coin for type purposes with the added charm of the O mintmark.

The August 1991 Chicago Bullet Auction

Specially Prepared for

Charles D. Moore

- 5103 NGC 1870 MS 64. Well struck with reddish-gray centers and aquamarine edges.
- 5104 NGC 1872-S MS 64. Fully struck with a faint glimmer of reflectivity in the obverse fields. Each side has brown-violet toning.
- 5105 PCGS 1859 PR 62. A significant type coin because of the modified Paquet design used only in this year. Additionally, proofs are also scarcer than the original mintage would suggest because many remained unsold at year's end and were melted. This is a brilliant coin and might grade a point higher were it not for the presence of a curving planchet flaw on the left obverse rim.

EARLY DIMES

- 5106 PCGS 1796 MS 62. While quite a few 1796 dimes were saved as the first of their kind and some 26 have been certified in mint state by PCGS, few are as strongly struck as this piece. The hair curls, stars, wreath, and eagle's plumage are all boldly detailed—we hesitate to call it fully struck because with coins struck on a screw press one can always find some area that was incompletely brought up. The dies were obviously polished as evidenced by both the reflectiveness in the fields and certain design details that were either lapped away or reduced in relief by the polishing process. The brilliance of the surfaces allows one to fully appreciate both the brightness in the fields and the strength of the strike, unobscured by toning. This coin has an eye appeal far beyond what one might normally expect from an early type coin in this grade. It is essentially without problems and a coin that could easily fit into a type set of coins graded several points higher.
- 5107 PCGS 1807 MS 63. Struck from the later clashed dies. As a result of the multiple clashing known on the one (and only) variety of this date the peripheral details have been considerably weakened. However, these Mint made problems do nothing to diminish the original mint luster and light gray and golden toning. One of only twenty coins to have been so graded of this date.
- 5108 NGC 1820 MS 63, JR-11, R.3. A sharply struck coin with many of the hair curls and stars well defined. The surfaces are generally clean and free from post-striking impairments and are covered by an even blue-gray patina. Finer than the Lovejoy specimen, this piece may well be the finest JR-11 known.
- 5109 PCGS 1825 MS 62, JR-4, R.2. Although a fairly common variety, the JR-4 is quite difficult in the better grades of mint state, this piece being one of the finest known. Virtually untuned and clean for the grade, the coin shows some striking weakness in the usual areas.
- 5110 NGC 1829 MS 62, JR-2, R.2. Well struck and highly lustrous. Both sides have significant portions of medium gray toning with considerable underlying brilliance still in evidence.
- 5111 PCGS 1831 MS 62, JR-4, R.2. Sharply struck with bright, sparkling luster and the barest hint of color on either side except for a streak of russet on the lower obverse.
- 5112 NGC 1832 MS 65, JR-7, R.3. Superb mint luster and for the most part untuned, but showing a pale iridescence on both sides, still, the coin presents as untuned at arm's length. Well struck with especially crisp detailing on the outer devices. This is perhaps the most difficult of the 1832 varieties to locate in high grades. This is undoubtedly the finest known JR-7, as the Lovejoy coin (then believed to be the finest known) graded NGC MS 63.
- 5113 PCGS 1835 MS 61, JR-4, R.2. Several proofs were struck from these dies and this coin undoubtedly was minted shortly after the proofs. There is a strength of strike uncommon to business striking and a clarity in the

profile fields that, while obviously not of proof quality, is certainly beyond that seen on other die pairings. A brilliant coin with planchet flaking noted on the reverse and quite a good deal of flash for the grade.

- 5114 PCGS 1835 MS 63, JR-9, R.2. Well struck throughout with good luster. The obverse is toned a medium gray while the reverse is a bright golden-red. Surely one of the finest known of the variety.

LIBERTY SEATED DIMES

- 5115 PCGS 1839 No Drapery MS 62. Struck in only three years. No Drapery dimes are a scarce and important type coin. This piece is fully struck with bright, lustrous surfaces that have an attractive brown patina that is evenly matched on both sides.
- 5116 NGC 1855 Arrows MS 63. Sharply struck with variegated gray and olive toning. A clean example of this short-lived type.
- 5117 PCGS 1859-O MS 60. Fully struck and lightly toned, but not quite lustrous enough to grade higher.
- 5118 NGC 1876-CC MS 63. Fully struck and deeply toned with strong underlying luster. Struck from rusted dies as usual.
- 5119 PCGS 1879 MS 65. A scarce low mintage issue with an original output of only 15,100 business strikes. This piece was struck from polished dies, yet one would not mistake it for a proof as the fields are not that deeply reflective, nor does the strike have the pinpoint detailing seen on proofs. However, the coin is sharply struck and both sides are covered with a deep multi-colored iridescence and the surfaces lack any noticeable abrasions. One of 32 gems graded to date (7 91) by PCGS.
- 5120 PCGS 1881 MS 64. Lustrous and sharply struck with only the lightest toning.
- 5121 NGC 1885 MS 64. Well struck with excellent luster and just the lightest hint of obverse color.
- 5122 PCGS 1886 MS 62. Toned.
- 5123 PCGS 1886 MS 64. Lustrous with attractive multi-colored toning.
- 5124 PCGS 1889 MS 64. Lustrous and toned.
- 5125 PCGS 1891 MS 61. Toned.
- 5126 PCGS 1891 MS 63. Lustrous and untuned.
- 5127 PCGS 1891 MS 63. Gray toning.
- 5128 Hallmark 1891 Seated dime MS 63, golden-red toning, and a 1915-D Barber quarter MS 63 PQ, light in color with good luster (Total: 2 coins)
- 5129 NGC 1891 MS 64. A lightly toned example of this final year of issue.
- 5130 PCGS 1863 PR 64. Deeply mirrored fields with attractive peripheral color. A date that is much in demand by collectors because of the paltry mintage of only 14,000 business strikes.
- 5131 NGC 1870 PR 63. Lovely golden-rose toning, a good looking coin for the grade.
- 5132 NGC 1877 PR 64. Bright iridescence in the fields.
- 5133 NGC 1878 PR 64. Deeply mirrored with bright olive green color on both sides that lightens considerably at the edges.
- 5134 PCGS 1881 PR 63. Deep monochromatic blue toning on the

The August 1991 Chicago Bullet Auction

Specially Prepared for
Charles D. Moore

obverse, multi-colored on the reverse.

- 5135 PCGS 1884 PR 66. A visually stunning Seated dime whose fields are very deeply mirrored and appear to be flawless. The obverse has an exciting bright crimson tone around the edge with a thin band of blue. The reverse is more subdued with a lovely mixture of blue and golden-rose.

BARBER DIMES

- 5136 PCGS 1892 MS 63. Brilliant.
- 5137 PCGS 1892 MS 63. Beautifully toned on the obverse with dynamic luster.
- 5138 PCGS 1892 MS 64. Attractive spotted iridescence. Fully struck.
- 5139 NGC 1893-O MS 63. Well struck with a deep speckled patina over both sides.
- 5140 NGC 1895 MS 65. A fully struck coin with bright luster. The obverse is mostly untoned in the center with areas of deep russet around the edge, while the reverse has more evenly distributed dark toning. This is the only coin of this scarce P-mint date to have been so graded by NGC, only two have been graded MS-65 by PCGS.
- 5141 PCGS 1897 MS 64. Lustrous and lightly toned.
- 5142 NGC 1898-O MS 64. Well struck for the issue with mottled red, blue, and golden toning on each side, deepening at the edges. One of only two pieces to have been so graded by NGC.
- 5143 PCGS 1905-O MS 65. A moderately scarce date in the lower grades of mint state, this coin becomes extremely difficult in grades approaching MS-65. And in gem, it is one of the most elusive in the entire Barber series. PCGS has only graded this piece in gem while NGC has certified five. The Monthly Summary for July values this date at \$6,100 in MS-65. The coin has superb luster and much of the original silvery-gray color is still in evidence while each side is accented by a light blue and lilac patina.
- 5144 PCGS 1911-S MS 62. Deep iridescent toning, but not quite lustrous enough to grade higher.
- 5145 PCGS 1911-S MS 66. We are fortunate to have two examples of the 1911-S Barber dime in MS 66. Both coins are indeed "like two peas in a pod" as their appearance is virtually identical. We wonder if an original roll of this date surfaced because of the uniform "look" of these coins—bright mint frost covers both sides with only the lightest touch of golden-brown around the edges (from a paper wrapper perhaps?). Clean and problem-free with good eye appeal.
- 5146 PCGS 1911-S MS 66. Like the coin above, the surfaces are clean and heavily frosted, being brilliant except for a thin band of golden color around the edges. Fully struck and very attractive.
- 5147 PCGS 1914 MS 63. Attractively toned with clean features.
- 5148 PCGS 1914 MS 64. Lustrous with mottled iridescent toning over the cheek of Liberty, evenly toned elsewhere.
- 5149 NGC 1916 MS 63. Originally and attractively toned.
- 5150 NGC 1896 PR 66. Technically perfect and at the same time visually appealing with deeply reflective proof mirrors and original patination that is a deep golden-yellow on the obverse while blue, red, and violet on the reverse. One of the more available dates throughout the three Barber denominations, yet only ten pieces have been so graded by NGC.
- 5151 NGC 1902 PR 63. Deep blue toning on the obverse.

MERCURY DIMES

- 5152 PCGS 1916 MS 65 Full Bands. Brilliant with excellent mint frost.
- 5153 PCGS 1916 MS 66 Full Bands. Blazing luster with a razor sharp strike.
- 5154 NGC 1916 MS 66 Full Bands. Deeply toned with superb underlying luster.
- 5155 PCGS 1917 MS 65. Superb luster with scattered bits of russet toning on the reverse.
- 5156 PCGS 1917 MS 65 Full Bands. A lovely early dime with light, even toning and strong underlying luster.
- 5157 NGC 1918 MS 65 Full Bands. Fully struck with bright, almost electric rose and lilac toning.
- 5158 NGC 1919 MS 65 Full Bands. Fully struck with no fadeaway at the rims. Streaks of light gray toning accent each side with strong underlying mint frost.
- 5159 PCGS 1923 MS 64 Full Bands. Clean features.
- 5160 ANACS 1924 MS 67 Full Split Bands. An original coin with speckles of deep, multi-colored iridescence.
- 5161 PCGS 1930-S MS 64. Evenly toned, almost complete band separation.
- 5162 PCGS 1930-S MS 65 Full Bands. Brilliant.
- 5163 PCGS 1930-S MS 65 Full Bands. Superb luster—a most attractive example of this scarce, low mintage dime.
- 5164 PCGS 1934-D MS 65 Full Bands. Brilliant.
- 5165 PCGS 1936-D MS 65 Full Bands. Lightly toned with clean surfaces.
- 5166 PCGS 1937 MS 66 Full Bands.
- 5167 PCGS 1937-S MS 65 Full Bands. Light, spotty color.
- 5168 PCGS 1939-D MS 66 Full Bands. Swirling mint frost.
- 5169 PCGS 1941-S MS 66 Full Bands. Brilliant.
- 5170 ANACS 1943-D MS 66 Full Split Bands. Deep speckled toning on the obverse, brilliant on the reverse.
- 5171 NGC 1943-S MS 66 Full Bands. Pleasing, yet somewhat dark, rainbow toning on each side.
- 5172 PCGS 1939 PR 67. A flawless proof Mercury with a hint of light color in the right obverse field.
- 5173 PCGS 1942 PR 66. Deeply reflective with light color on the reverse.
- 5174 NGC 1942 PR 66. An original coin with light, hazy iridescence. Has anyone noticed how cheap these are now?

ROOSEVELT DIMES

- 5175 PCGS 1949-S MS 67. Nice coin with good color.

EARLY QUARTERS

- 5176 PCGS 1806 VF 20. Although well worn on the uppermost devices the main portions of the design still retain ample

The August 1991 Chicago Bullet Auction

details. Blue-gray in the fields with deeper red-russet around the devices.

5177 ANACS 1815 AU 50. First year of the new Capped Bust design. This piece is well struck with slight friction on the hair curls and other highpoints. The surfaces are deeply toned with a strong underlying blue tint and show no obvious or detracting marks.

5178 NGC 1831 MS 65. Struck at a time in the nation's history when minor coinage was desperately needed in the channels of commerce, there was little opportunity and few people had the inclination to set aside mint state silver coinage. Thus, gem condition Bust quarters are among the scarcest of all 19th century types. This piece is very sharply detailed. The surfaces are original and untampered, showing deep blue and brown patina with strong mint luster glowing underneath. Only two other coins of this date have been so graded by NGC. PCGS has graded six.

LIBERTY SEATED QUARTERS

5179 PCGS 1865 MS 62. Struck in the waning days of the Civil War, a sure Union victory did little to reintroduce silver coinage back into the commercial mainstream. Quarter dollars of this date were hoarded just as were the previous dates from the War. A low mintage (58,800) also insured that few mint state pieces would survive, and indeed only six other coins of this date have been so graded by PCGS. This piece is untuned and fully struck with minimal abrasions for the grade. A presentable example of this scarce wartime issue.

5180 PCGS 1877-CC MS 64. Fully struck and lightly toned with the usual outstanding mint frost. A terrific type coin.

5181 NGC 1879 MS 64. First of the low mintage issues from the 1879-1890 era with an original mintage of only 14,700 pieces. This coin is fully struck in every detail and brilliant with strong profile fields that have just a bit of cartwheel in them that distinguishes it from a more common proof. A lovely example of this scarce issue.

5182 NGC 1869 PR 63. Deep golden-rose centers with a thin ring of blue around the edges.

5183 PCGS 1871 PR 62. Blue and purple coloration.

5184 PCGS 1879 PR 63. Central brightness surrounded by pastel iridescence.

5185 PCGS 1883 PR 63. Deeply toned with highly reflective fields. A popular date as a proof because of the scant mintage of only 15,439 business strikes.

BARBER QUARTERS

5186 PCGS 1892 MS 64. Smooth, virtually unblemished surfaces with light golden toning and superb luster. An outstanding buy at today's levels.

5187 PCGS 1892-O MS 63. Light golden toning in the centers with blue at the edges. Good luster.

5188 NGC 1892-S MS 63. Semi-profile like with blue and purple toning over both sides. Sharp looking coin for a 63.

5189 PCGS 1894-S MS 64. Deep green and red toning with strong underlying luster.

5190 PCGS 1896 MS 65. Fully struck in all areas with thick mint frost and attractive peripheral color. Scarcer than one might imagine with only six pieces having been so graded by PCGS.

5191 PCGS 1912 MS 63. Brilliant.

5192 PCGS 1915-S MS 64. Fully struck and untuned. A sharp looking coin.

STANDING LIBERTY QUARTERS

5193 NGC 1916 MS 64. A rare high grade example of this popular low mintage issue. Only 52,000 pieces were struck and most went into circulation with only a couple of handfuls of mint state coins surviving. This piece has strong head detail and is originally toned in light shades of golden, blue, and russet, deepening to charcoal around the edge of the obverse. The reverse has a band of light brown patina around the edge and the surfaces overall show a pronounced matte finish. NGC has only certified 26 pieces in this grade with only 13 finer.

5194 NGC 1917 Type One MS 65. Fully struck with bright mint luster showing beneath the spotty golden-brown patina on each side.

5195 PCGS 1918 MS 64. Light in color with a strong strike.

5196 PCGS 1920 MS 64. Sharply struck with good head detail. Toned a deep gray-olive with charcoal encrustations around the edges and outer devices.

5197 NGC 1924-D MS 65. Thick mint frost with complete digits in the date but no head detail.

5198 PCGS 1928-S MS 65. Almost complete head detail on Liberty with minimal abrasions. Bright, lustrous surfaces that are framed by a deep golden-brown around the outer devices.

5199 PCGS 1930 MS 64 Full Head. Brilliant with superb luster.

WASHINGTON QUARTERS

5200 PCGS 1932-D MS 64. This key date in the popular Washington series is not often available in such clean condition. There are virtually no marks on the central devices, the few marks there are being limited to the fields. Luster is strong as is the strike, and there is just the faintest trace of color on the obverse. A superb upper-end coin that certainly resembles a full blown gem.

5201 NGC 1935 MS 66. Near perfect surfaces.

5202 ANACS 1935-S MS 65. Deep rainbow iridescence.

5203 NGC 1935-S MS 66. A superb coin with a touch of peripheral color. 1939 PR 66, deeply reflective with just a hint of light obverse color; and a 1950 PR 67, perfect surfaces with a fragile haze of light, original color. (Total: 3 coins)

5204 PCGS 1937 PR 66. Light, hazy original color on this scarce, early proof.

5205 NGC 1941 PR 67. An extraordinary proof quarter whose surfaces appear to be perfect and are overlaid by a pale pastel iridescence.

EARLY HALF DOLLARS

5206 PCGS 1796 VF 25. 15 Stars. The 1796-97 halves are one of the classic issues in United States coinage. With a combined mintage of only 3,918 pieces for both years this is the smallest mintage for a regular issue U.S. half dollar. These halves are highly sought after in all grades from AG to mint state. This is a pleasing coin with no distracting field marks, good details, and light gray color offset by an even lighter shade on the devices. A coin for either the beginning or

The August 1991 Chicago Bullet Auction

Specialty Prepared for

Charles D. Moore

advanced collector that need never be upgraded.

5207 PCGS 1801 VF 20. Original patina on both sides and well detailed for the grade. An attractive early half dollar.

5208 PCGS 1822 MS 62. Sharp obverse details with sparkling mint luster and attractive toning.

5209 PCGS 1823 MS 61. Double Profile. Frosted mint luster with a light overlay of gray toning.

5210 PCGS 1824 MS 62. Fully lustrous with light golden-brown toning that deepens a bit toward the edges. Quite an attractive coin for the grade that should be examined by anyone needing an affordable mint state type coin.

5211 NGC 1827 MS 63. An extraordinarily well struck Bust half dollar with equal striking pressure seen in all areas, most of which are completely brought up. The fields show evidence of having been struck from striated dies, thus giving the coin a semi-profile appearance. Deeply and originally toned in shades of gray-violet in the fields while the devices are outlined in a royal blue. An very appealing Bust half.

5212 PCGS 1827 MS 64. A remarkably clean Bust half that is sharply struck with only minor wear seen on two of the upper stars. Lustrous and covered with an even layer of gray and olive patina. Only 17 halves of this date have been so graded by PCGS.

5213 PCGS 1832 MS 60. Full mint state luster with deep cinnamon brown toning. A bit irregularly struck with details on the left portion of each side being weak.

5214 PCGS 1833 AU 55. Untoned and lustrous with no significant marks.

5215 PCGS 1834 EF 45. A nicely toned piece with light, even wear evident on the high points.

5216 NGC 1834 MS 61. Light, even toning with a couple of reverse field scratches that prevent a higher grade.

LIBERTY SEATED HALF DOLLARS

5217 PCGS 1851-O MS 61. Possible Proof. The 1851-O is a scarce No Motto half, especially in mint state. In proof, one is known for certain to exist. It appeared in the 1975 ANA Sale and had been poorly cleaned according to Walter Breen. Many 1851-O halves show profile fields, some were struck from a die that had been so drastically repolished that the lapping effaced the drapery. This coin may be more profile than usually seen. It may indeed be more than a profile. We leave it to those viewing this piece to draw their own conclusions about this coin's status. In addition to reflective fields the devices are completely struck up. There are also a number of small abrasions as indicated by the grade and the obverse is framed by a deep golden-russet and blue around the edge while the reverse has a lighter golden hue across that side. An interesting piece that is sure to provoke much discussion among those who view it.

5218 PCGS 1853 Arrows and Rays MS 63. Well struck, albeit a trifle soft on the stars and hair on the obverse, as is often the case. Unlike many A&R halves this piece has excellent luster and is covered with an even layer of gray-golden toning with a faint glimmer of underlying rose and blue. A lovely example of this scarce and desirable one year type of which only 32 pieces have been so graded by PCGS.

5219 NGC 1855-S Arrows MS 61. The 1855-S is by far the rarest among the various issues in the Arrows series. Its mintage was small (129,950) but its scarcity goes far beyond a low mintage. Apparently most of the coins produced were shipped directly from the San Francisco mint east to China. Breen notes that one appeared in a Merkin auction in 1968 with a chop mark, lending circumstantial evidence to their export to the Orient. This piece has swirling mint luster and

is strongly struck throughout, the entire coin being covered by a thin layer of golden-brown toning with an occasional bit of blue around the periphery. As mentioned, the 1855-S is very rare. It is virtually never offered in true mint state—this being the only mint state coin to have been graded by either of the major grading services. A singular opportunity for the collector of rare 19th century U.S. silver coins.

5220 PCGS 1858 MS 63. Highly lustrous and light in color with semi-profile fields and showing a couple of areas of localized striking weakness. An attractive and affordable No Motto half.

5221 PCGS 1879 PR 63. Highly reflective surfaces with a steely glint of silvery-gray toning over both sides.

5222 PCGS 1881 PR 63. Deep blue-violet toning on the obverse contrasted against a pale lilac-golden on the reverse. Scarce low mintage date.

BARBER HALF DOLLARS

5223 PCGS 1893-O MS 63. Untoned and fully struck with good luster.

5224 NGC 1894-O MS 66. A superb Barber half with thick, swirling mint luster. Strong eye appeal for a New Orleans product. This is the only MS 66 of this date to have been graded by either PCGS or NGC. An outstanding example of this elusive half.

5225 PCGS 1896 MS 63. Well struck with light toning on the obverse, slightly darker on the reverse.

5226 NGC 1907 MS 64. Smooth lustrous surfaces with a layer of brown-gray patina over both sides.

5227 PCGS 1896 PR 63. Lightly toned with heavy cameo contrast on each side. Downgraded by the presence of a couple of unfortunate slide marks on the cheek.

WALKING LIBERTY HALF DOLLARS

5228 NGC 1916-D MS 65. Fully struck with well defined skirt lines. A well balanced coin that has deep blue and golden-gray toning intermixed on each side. One of 30 gems to have been so graded by NGC.

5229 NGC 1918-D MS 63. A trifle weak in the centers and covered with a charcoal gray patina.

5230 PCGS 1920-D MS 63. A scarce early half, this piece has exceptionally clean surfaces, more suggestive of a higher graded coin. As usual the central details are somewhat soft, but the head detail is above average. An untuned coin and one of only 32 to have been so graded by PCGS.

5231 PCGS 1927-S MS 63. Superb, frosty mint luster with a light layer of toning on each side. Slightly soft on the hand and upper skirt lines as usual.

5232 PCGS 1928-S MS 62. Untoned with the usual soft central details. Good luster and clean fields.

5233 PCGS 1935 MS 65. Full strike.

5234 PCGS 1935-D MS 63. Average strike, above average luster.

5235 PCGS 1936-D MS 65. Full strike.

5236 NGC 1938 MS 65. Attractively toned on the obverse and one of the most underrated linebackers in the NFL.

5237 PCGS 1939-S MS 65. Bright, sparkling luster with a full strike.

The August 1991 Chicago Bullet Auction

5238 NGC 1941-S MS 63. Average strike with bright, rainbow toning.

5239 NGC 1943 MS 66. Brilliant--a pretty snazzy looking coin.

5240 PCGS 1943-S MS 65. Brilliant with clean surfaces and as fully struck as a P-mint.

5241 PCGS 1943-S MS 65. Brilliant and fully struck.

5242 NGC 1944-S MS 64. Lustrous with attractive obverse toning. Average strike.

5243 PCGS 1945-S MS 65. Well struck with good luster.

5244 NGC 1945-S MS 65. Well struck with deep rainbow toning from many years in a manila 2x2 envelope.

5245 PCGS 1947-D MS 66. A scarcer issue among the short set of Walkers. Streaks of light lilac and golden toning and fully struck.

5246 PCGS 1937 PR 65. Pale lavender toning on this scarcer early proof.

5247 PCGS 1938 PR 66. Deep, flashy surfaces and mostly brilliant with just a touch of light color. Scarcer early proof.

5248 PCGS 1939 PR 66. Flashy and deeply reflective.

5249 NGC 1939 PR 68. Astonishing quality in a proof Walker that is brilliant with the most beautiful oil slick iridescence imaginable in the fields. One of only two pieces to have been so graded by NGC. PCGS has graded six.

5250 NGC 1941 PR 65. Dazzling, mirrorlike reflectiveness. Struck from heavily polished dies that have effaced the designer's initials.

5251 NGC 1942 PR 66. Not only is this piece technically correct for the grade, but it also possesses that elusive quality: eye appeal. There are a few scattered spots of original color around the edge of the obverse.

FRANKLIN HALF DOLLARS

5252 PCGS 1949-S MS 65. Attractive golden-red toning, apparently acquired from a Mint set.

EARLY DOLLARS

5253 ANACS 1795 Draped Bust VF 20. B-14. R.3. Good details for the grade and very light in color for a coin of this age. No adjustment marks but on the reverse there is the imprint of a thread struck into the coin just above the eagle's wing and there are two small planchet flakes out of the reverse rim at four o'clock.

TRADE DOLLARS

5254 PCGS 1875-CC MS 63. Bright lustrous surfaces with only a couple of toning streaks on the reverse. Fully struck with a number of widely scattered small abrasions. About as nice a coin as one could hope for in this grade.

5255 PCGS 1875-S MS 63. A pleasing coin for the grade with lustrous fields and fully struck devices. There are a number of very small abrasions in the fields but they are little evident to the unaided eye. Lightly toned, not obscuring any of the visual impact of the coin.

5256 PCGS 1876 MS 63. Brilliant with minimal abrasions but perhaps not quite lustrous enough to grade any higher.

5257 PCGS 1876-S MS 63. An original coin that is fully struck and toned a variegated golden-rose with light blue at the edges.

5258 NGC 1876-S MS 63. Well struck with light brown toning and good underlying luster.

5259 PCGS 1878-S MS 64. Fully struck even to the top of the eagle's wing and showing no noticeable abrasions on either side. The fields have lovely muted iridescence that really come to life when rotated beneath a light, also revealing the coin's original mint frost beneath the toning.

5260 PCGS 1874 PR 63. Good depth of mirrors in the fields and untuned except for a light gray haze over both sides that conceals a few discreet hairlines.

5261 PCGS 1874 PR 64. In a word: flashy. A brilliant coin with deep pools of reflectivity in the fields that are set against the heavily frosted devices, creating a stark cameo contrast. A few light hairlines, but who cares when a coin has this much eye appeal?

5262 PCGS 1880 PR 66. A majestic proof Trade dollar whose fields are deeply mirrored and flash forcefully through the olive-blue and red-violet central toning that turns a deep blue at the edges. The surfaces are free from post-striking impairments and appear to be completely free from hairlines. An excellent type coin and one of only 10 pieces of this date to achieve such a lofty grade, exceeded by only one piece (a Proof 67).

5263 PCGS 1882 PR 62. A much more attractive coin than one might imagine from the grade. Although the fields show a few discreet hairlines they are still highly reflective and there is a sharp cameo contrast on each side.

5264 NGC 1882 PR 67. Undoubtedly the Trade dollar is one of the most beautiful designs ever struck in the U.S. mint, and when a proof such as this appears it is truly breathtaking. The mirrors have an unfathomable depth of reflectivity and set up a deep cameo contrast against the heavily frosted devices. The obverse is toned in bright shades of olive, rose, blue, and green, while the reverse shows only a suggestion of faint peripheral color. An impressive and highly desirable example of this scarce proof-only date. One of only two pieces to have been so graded by NGC. PCGS has only certified three.

MORGAN DOLLARS

5265 PCGS 1879 MS 64. Excellent luster with a strong strike.

5266 PCGS 1880, 1881, and 1884. All grade MS 64 and are a sharply struck group of untuned dollars. (Total: 3 coins)

5267 PCGS 1880-CC MS 64. Lightly toned with the usual strong luster underneath.

5268 PCGS 1880-S MS 65 Prooflike. Brilliant.

5269 PCGS 1881 MS 63. Brilliant and sharply struck.

5270 PCGS 1881 MS 64. Sharply struck with superb luster and a clean cheek. A good value when compared to the price for an MS-65.

5271 PCGS 1881-S MS 65 Prooflike. Striated fields with a mild cameo contrast.

5272 NGC 1883 MS 65. Virtually flawless surfaces with smooth mint luster, only lacking a bit of highpoint detail to grade MS 66.

5273 ANACS 1883 MS 66. Excellent mint luster, the cheek of Liberty is unmarked by coin to coin contact.

The August 1991 Chicago Bullet Auction

5274 PCGS 1883-CC MS 64 Prooflike. Brilliant with superb mint frost.

5275 PCGS 1883-S MS 65. Despite an original mintage of 6.25 million pieces, the 1883-S is one of the major condition rarities in the Morgan dollar series. Only five, yes FIVE, pieces have been graded MS 65 by PCGS, and none are finer. This coin has the sparkling luster 1883-S dollars are known for and it is well struck, but not completely so, in the centers. There are no marks of any consequence and each side has a thin veil of light golden toning. A memorable specimen of this Morgan dollar rarity.

5276 PCGS 1884-CC MS 65. A very clean, upper-end coin that is definitely a cut above most CC dollars, even in gem condition. Excellent mint frost.

5277 PCGS 1884-O MS 65 Deep Mirror Prooflike. Clean devices with only the smallest of luster breaks. Heavily frosted with a pronounced cameo effect. One of 89 pieces to have been so graded (791).

5278 PCGS 1885-S MS 63. Bright mint frost.

5279 PCGS 1886 MS 65 Deep Mirror Prooflike. A lovely cameo dollar with unfathomably deep mirrors. One of only 62 pieces to have been so graded of this issue.

5280 PCGS 1887-S MS 63. Frosty mint luster with evidence of roller marks over the ear.

5281 PCGS 1888 MS 65 Fully struck with bright coruscating luster.

5282 PCGS 1888-O MS 64. Clean enough and lustrous enough to grade MS-65, just a bit weakly struck in the centers.

5283 NGC 1888-S MS 64 Multi-colored toning on the obverse with a ring of color around the edge of the reverse. Scarce issue in high grade.

5284 NGC 1889 MS 65. Brilliant with excellent luster and well struck on the obverse, but showing central striking weakness on the reverse.

5285 PCGS 1889-O MS 64 Quite a lovely coin with an above average strike and smooth surfaces.

5286 PCGS 1890-CC MS 63 Fully struck with a light gray patina over both sides.

5287 PCGS 1890-S MS 63 Fully struck and untoned.

5288 PCGS 1890-S MS 65. Fully struck with a clean cheek and thick, frosty mint luster. The reverse is prooflike.

5289 NGC 1891 MS 65. A very scarce Morgan dollar in any grade of uncirculated, gems are among the most elusive of all issues in the series. This piece is attractively toned with strong underlying luster, and just a bit soft in the centers as usual. The surfaces show only the most trivial of abrasions, none of which are distracting. Rare in gem condition with only seven pieces having been so graded by NGC.

5290 NGC 1891-CC MS 64. Well struck with bright, sparkling luster—generally untoned on the obverse with light golden-brown color on the reverse.

5291 PCGS 1892-CC MS 63. Excellent luster. Numerous small marks but no large ones.

5292 PCGS 1892-O MS 63. Untoned.

5293 NGC 1894 MS 62. Steel-gray patina over both sides with darker encrustations around the outer devices. Clean surfaces, just a bit dull. Still, a valuable specimen of this rare, low mintage issue.

5294 PCGS 1896-S MS 63. Frosted and highly lustrous but somewhat weak in the centers as is often the case with this

issue. Minimally abraded.

5295 NGC 1897-O MS 62 Deep Mirror Prooflike. This issue is notorious for poorly struck coins with dull luster. This piece is the most attractive example we can remember having seen in recent memory. As one might expect from such a poorly executed date, prooflike coins are rare. It would be reasonable to conclude that if so little care was taken in basing the dies that the strike and luster would suffer so, then mint employees would certainly not care enough to polish the dies. And that is a valid conclusion as only a handful of deeply reflective prooflikes exist of this issue. This piece stands as a sterling reminder that there are exceptions to every rule. The fields of this coin are deeply reflective on each side and the devices show quite a strong cameo contrast of equal strength on the obverse as well as the reverse (some PL dollars of this date only show an obverse cameo). However, typical for the date, the abrasions that are present are mostly concentrated on the obverse. The strike is quite exceptional with the diagonal strand of hair immediately over the ear showing. A brilliant, dazzling example of this rare date in the Morgan series. Only one other (also a MS-62) has been so graded by NGC.

5296 PCGS 1900 MS 65. Brilliant with superb mint frost.

5297 PCGS 1900-S MS 64. Outstanding luster and few marks to speak of, but a bit soft over the ear and on the eagle's breast.

5298 NGC 1901-S MS 64. Brilliant and fully struck with minimal abrasions on the devices. A scarce issue in 64 or better condition.

5299 NGC 1902-O MS 66. Light golden-gray toning in the centers surrounded by a ring of blue around the edges. Strong underlying luster.

5300 PCGS 1903 MS 64. Fully struck with satiny luster.

5301 NGC 1921 MS 64 Prooflike. Brilliant with good depth of mirrors in the fields. The strike is noteworthy on this coin with fully detailed leaves in the wreath.

5302 NGC 1921 MS 65. Fully struck with bright, sparkling luster that is almost brilliant but shows a light speckling of russet color on the obverse, a more even rose tone across the reverse.

5303 PCGS 1921-D MS 64. Deeply toned but still showing the original fiery mint luster this issue is known for.

5304 PCGS 1921-D MS 65. Clean surfaces with thick, frosty mint luster and just a trace of light iridescent color. Because it is both a one year type and the only year Denver struck Morgan dollars, a gem 1921-D would be a good coin to salt away.

PROOF MORGAN DOLLARS

5305 PCGS 1880 PR 66. This proof Morgan is one of the most visually interesting and attractive coins in this auction. The centers are clear and surrounded by subtle shadings of blue, violet, and rose. The surfaces themselves appear perfect, but oddly enough, technical perfection is of secondary importance on this coin. The sheer eye appeal and layers of color make this proof dollar the dazzling coin that it is. One of fourteen to have been so graded by PCGS.

5306 NGC 1881 PR 65. A lovely proof Morgan with identically toned sides—the centers are a golden-brown that deepen to a violet around the inner portions of the peripheral devices, while the whole is framed by deep royal blue at the edges. Full, intricate striking details and good reflectivity in the fields.

5307 NGC 1899 PR 65. Even though both sides are covered with a layer of deep golden-brown toning that turns blue at

The August 1991 Chicago Bullet Auction

the edges), the highly reflective proof mirrors still flash forcefully through giving the coin that unmistakable allure that only proof dollars seem to have. One of only five pieces to have been so graded by NGC, ten have been graded by NGC.

PEACE DOLLARS

- 5308 PCGS 1922-S MS 63. Brilliant and sharply struck.
- 5309 PCGS 1926-D MS 65. A fully struck coin with immaculate surfaces and light, even toning.
- 5310 PCGS 1927-D MS 64. Fully struck with bright, sparkling luster and clean surfaces for the grade.
- 5311 PCGS 1934 MS 64, and a 1935 MS 64. A well matched pair with untuned, sharply struck surfaces. (Total: 2 coins)

COMMEMORATIVE GOLD

- 5312 PCGS 1905 Lewis and Clark MS 64. The key issue among commemorative gold pieces by a substantial margin. Only 118 coins have been graded of the 1905 date while almost twice that number have been certified of the 1904s. Smooth surfaces that are bright and lustrous having taken on a yellow-gold color with faint traces of steel-blue intermixed. A most attractive, upper-end example of this rare issue.
- 5313 PCGS 1915-S Panama-Pacific Gold Dollar AU 58. Light friction on the laborer's cap.
- 5314 NGC 1915-S Panama-Pacific Gold Dollar MS 64. An original coin with strong eye appeal with a couple of copper stains on the obverse.
- 5315 PCGS 1926 MS 63 Sesquicentennial. Fully struck with clean features.

ONE-DOLLAR GOLD PIECES

- 5316 PCGS 1853 MS 63. Fully struck with few noticeable abrasions.
- 5317 PCGS 1853 MS 64. Fully struck with rich orange-gold color and thick mint luster. An excellent high grade Type One gold dollar.
- 5318 PCGS 1854-D VF 20. A very rare Dahlonga gold dollar with an original mintage of only 2,935 pieces. Virtually unknown in the higher grades of mint state, this VF piece is a nice representative example of this rare coin. The surfaces have a bright sheen with an orange and steel blue color. There are a few abrasions on each side that are consistent with the grade.
- 5319 NGC 1854 Type Two AU 53. A coin that shows evidence of light circulation with good portions of luster remaining in the fields, especially in the more protected areas around the devices. Medium yellow-gold color with no distracting marks. There is only the faintest evidence of the clashing on the obverse, evidently most having been polished away.
- 5320 PCGS 1855 Type Two MS 61. One of the sharpest struck Type Two gold dollars we have seen recently. The hair curls are fully defined and the middle digits of the date show no weakness. Otherwise the coin is fully lustrous with rich reddish-orange color. There are a few small abrasions, but nothing of any real concern. An excellent mint state type coin.
- 5321 PCGS 1859-C EF 45. A very scarce issue from this popular Southern mint. While this issue is known for drab luster,

poorly prepared planchets and indifferent strikes this piece is actually quite nice with only minor striking weakness noted and a couple of small abrasions in the fields. Rarely encountered any finer than the present coin.

- 5322 PCGS 1859-D AU 50. The 1859-D gold dollar is a very scarce issue in grades up to and including AU, being quite rare in full mint state. This coin has bright, semi-reflective fields and minimal abrasions. The strike is irregular with certain areas being quite strong (certain portions of the wreath and outer legends) while other parts are weak (top of the feathers on the headdress and center of the date). The coin does not show any of the usual planchet defects seen on this issue, and as such is a pleasing example of this difficult, usually problem-ridden issue.
- 5323 PCGS 1873 Open 3 MS 63. Sharply struck with attractive reddish-orange tinted luster that shows a hint of olive at the edges.
- 5324 ANACS 1873 Closed 3 AU 50. An exceptionally rare gold dollar with an original mintage of only 1,800 pieces. Compare this mintage with that of its counterpart, the Open 3, with an output of 123,300 and one begins to understand the absolute rarity of this coin. Closed 3 dollars always have profilelike fields, and this piece is no exception, only slightly dulled by ten points of wear. Overall a clean, problem-free example of this rare gold dollar.
- 5325 NGC 1873 Closed 3 MS 61. One of the very few mint state examples of this major rarity in the gold dollar series. As always, this piece has profilelike fields and the devices are sharply struck. Unfortunately scarred on the neck of Liberty by a vertical scratch, otherwise the coin would surely grade much higher. Only 24 coins have been graded in all conditions of mint state by both of the major grading services.
- 5326 NGC 1880 MS 64. Fully struck with astonishing depth of reflectivity in the fields that contrast against the heavy golden frost on the devices. A sparkling profilelike example of this popular low mintage issue.
- 5327 PCGS 1880 MS 67. A very popular low mintage date with an original production of only 1,600 pieces. There are a number of high grade survivors though, but only 23 pieces grade as highly as this one. Unlike many dollars of this date, this coin does not have profilelike fields. Rather, the surfaces are heavily frosted and have taken on a deep orange and steel-blue patina. A wondrous coin with virtually perfect surfaces.
- 5328 PCGS 1884 PR 65. An interestingly toned proof with deep reddish color on the right side of both the obverse and reverse. While there were 1,006 proofs struck of this date nowhere near that number survive today. It is thought by some that many proofs of the 1880s were used as baubles on bracelets. This may well be as there have only been 30 pieces certified by PCGS in all grades. Only eight gems have been graded and none are finer.
- 5329 NGC 1888 PR 64. A superb, deep mirror proof with glittering fields and bright yellow-gold color. Few hairlines can be seen and this coin has most of the eye appeal of a full gem coin. Again, like the 1884 above, nowhere near the original mintage of 1,079 proofs exist and today only six have been graded PR 64 by NGC while PCGS has certified twenty.
- 5330 PCGS 1807 MS 61. Struck from the same reverse die as the 1807 dime above, this coin shows only minor striking weakness in the centers and the surfaces are peppered with numerous small marks, but none of any real consequence. Struck in bright yellow-gold, the coin shows good luster and is quite rare in mint state as one would expect. This is the only MS-61 PCGS has graded out of a total of seven for the

Charles D. Moore

entire year in all conditions of mint state, none are finer than MS 63.

5331 NGC 1836 EF 40. A pleasing coin for the grade.

5342 NGC 1836 AU 55. Almost complete mint luster remains but the hair curls are weak as usual. Clean surfaces with no detracting marks. An attractive and highly collectible grade for this type.

LIBERTY QUARTER EAGLES

5333 PCGS 1842-D VF 30. A great rarity among Southern gold issues, the 1842-D is virtually unlocatable in AU or mint state. This present piece is a pleasing mid-range VF that is weakly struck on the hair curls and eagle as usual, but the surfaces overall are very clean and have taken on an attractive olive tone in the fields. An important coin for the gold specialist.

5334 NGC 1853 MS 62. Fully struck on the obverse but showing the usual weakness on the left leg of the eagle on the reverse. Early Coronet quarter eagles are all very elusive in mint state.

5335 NGC 1853-D VF 20. A scarce and highly respected Dahlonega quarter eagle that ranks as one of the most difficult in the entire series in high grade. This coin is not high grade, nor does it rank close to condition census; yet, this piece is a pleasing, problem-free example with virtually unblemished surfaces and deep orange-red patina over both sides.

5336 ANACS 1856-O EF 45. The 1856-O is a significant rarity among branch mint issues, but is little known outside a small group of specialists in this series. The half dozen or so AU coins and the single mint state piece that are known are found in major gold collections, making this lustrous EF the finest piece obtainable on today's market. Well struck for the issue with rich reddish-golden color.

5337 PCGS 1868 AU 55. A very scarce and overlooked issue with an original mintage of only 3,600 with very few survivors remaining. Typical of the issue, the coin has bright prooflike fields and is well struck and shows the diagnostic raised dot on the neck of Liberty from rust pitting.

5338 PCGS 1868-S EF 40. Another scarce and often overlooked issue—perhaps overlooked because of its rather substantial mintage of 34,000 pieces—however seldom is a '68-S available in AU or mint state. This piece is sharply struck most of this issue are not, and the fields and devices are free from any noticeable abrasions.

5339 PCGS 1873 AU 58. Only slight friction in the fields.

5340 PCGS 1881 AU 55. One of the rarest and odd, one of the most overlooked, of all Coronet quarter eagles. The original mintage was a mere 640 pieces. Only a couple of mint state coins exist and this piece is tied with several others at the AU 55 level in the mid-range of condition census. Apparently all business strikes have deep prooflike fields, making the distinction between them and impaired proofs difficult to determine. This piece is deeply reflective but shows just a bit of striking weakness on the right leg of the eagle, which would be uncharacteristic of a proof striking. There is light friction in the fields but no significant impairments on either side. One of only three pieces to have been so graded.

5341 PCGS 1883 AU 55. Sharply struck with prooflike fields. Scarcer, low mintage issue with only 2,002 pieces minted.

5342 PCGS 1886 AU 55. Sharply struck and semi-prooflike with a few light blemishes. Scarce, low mintage date with only 4,000 pieces minted.

5343 PCGS 1895 AU 58. Fully struck with semi-prooflike field.

5344 PCGS 1903 MS 64. Sharply struck with bright coruscating luster.

5345 ANACS 1904 MS 63. Sharply struck with good luster.

5346 NGC 1904 MS 64. Fully struck with superb luster.

5347 ANACS 1905 MS 60. Semi-prooflike.

5348 PCGS 1906 MS 63. Fully struck with a deep orange-gold patina.

5349 PCGS 1906 MS 64. Fully struck with muted orange and steel-blue patina.

5350 PCGS 1907 AU 58. Good color and just a touch of friction.

5351 PCGS 1907 MS 62. Lustrous.

5352 PCGS 1907 MS 64. A sharp looking, upper-end coin with thick, pounding luster and a full strike.

INDIAN QUARTER EAGLES

5353 PCGS 1911-D MS 64. The key date in this short and collectible series of 20th century gold. Once the collector has this coin all the other Indian quarter eagles will fall easily in line. Not many MS 64 or 65 1911-D quarter eagles enter the market because most are locked up in collections, making this a special opportunity for the collector needing this rare issue. The surfaces are lustrous and have a reddish hue and the mintmark is unusually pronounced. One of only 21 pieces to have been so graded by PCGS.

5354 NGC 1925-D MS 63. Fully struck with bright, lustrous surfaces.

5355 NGC 1925-D MS 63. A clean coin with deep reddish color.

5356 NGC 1925-D, 1926, 1927, 1928, and 1929. The coins all grade MS 63 and are uniform in color, luster, and strike. A nice grouping and a good starter set of this completable 20th century gold series. (Total: 5 coins)

5357 NGC Six 1925-D quarter eagles, all grade MS 63. The coins are fully struck with excellent luster, a few show deeper reddish-copper color. (Total: 6 coins)

5358 NGC 1925-D MS 64. Fully struck with deep orange colored devices.

5359 PCGS 1926 MS 63. Lustrous and fully struck with a few small field marks.

5360 NGC 1926 MS 63. Bright mint luster.

5361 NGC 1926 MS 63. Bright, yellow-gold color.

5362 NGC 1926 MS 64. Fully struck and light in color.

5363 NGC 1927 MS 63. Full strike.

5364 NGC 1927 MS 63. Deep reddish-orange color with strong mint luster.

5365 ANACS 1927 MS 64. Superb pink tinted luster.

5366 NGC 1928 MS 63. Uncommonly bright fields, almost semi-prooflike.

5367 NGC 1928 MS 63. Lustrous and minimally abraded.

5368 NGC 1928 MS 63. Only a couple of obverse field marks keep this coin from grading higher.

5369 NGC 1928 MS 64. Rich orange-gold color with a few field

The August 1991 Chicago Bullet Auction

marks on the reverse.

5370 NGC 1929 MS 63. Bright surfaces.

5371 NGC 1929 MS 63. Deep orange color on both sides.

THREE-DOLLAR GOLD PIECES

5372 ANACS 1856-S EF 40. Medium S. Evenly worn and still showing traces of luster in the protected areas, the surfaces are clean except for one scratch in the field above the head. The 1856-S is the least rare of the S-mint threes and this should prove a relatively affordable coin.

5373 PCGS 1868 EF 45. While not of great significance in the three-dollar series, the 1868 is nevertheless a scarce date with an original mintage of only 4,850 pieces. This coin has orange-gold fields with lighter pink outlining the devices.

5374 PCGS 1878 MS 63. Superb mint frost with only the most trivial abrasions on the face of the Indian. Strong eye appeal for the grade and a good value.

EARLY HALF EAGLES

5375 PCGS 1807 Bust Right VF 35. By degree of wear and remaining luster this coin should grade EF, but it has been downgraded because of the presence of two areas of planchet flaking on the obverse. One area is in dead center while the other is in the right field just out from the nose. While these are Mint created problems, they are nonetheless problems, and as such diminish the value of the coin, thus the VF grade. Otherwise a clean early five with good color and minimal post-striking impairments.

LIBERTY HALF EAGLES

5376 ANACS 1840-O EF 45. Scarce first year of issue for the Coronet fives from the New Orleans mint. Sharply struck, with especially strong details at the edges. An original coin with problem-free surfaces.

5377 PCGS 1842-D Large Date VF 20. According to David Akers, "...this is the rarest Dahlonega half eagle, more rare in all grades than the more highly regarded 1861-D. In fact, a strong case could be made for this being the rarest D-mint coin of any denomination." This is an original coin with deep golden color in the fields and on the devices, contrasted against a lighter yellow-gold overall. There are few field marks to distract the viewer and the coin presents very well in spite of forty points of wear.

5378 PCGS 1843-O EF 45. Small Letters. Well struck with attractive light orange-red color. A pleasing example of this scarce, low mintage issue.

5379 PCGS 1846-O EF 45. A scarce and undervalued issue, much scarcer than its mintage of 58,000 might indicate. This piece is fully detailed and shows rich reddish-coppery color with a moderate amount of flash in the fields. Definitely a cut above most early Southern gold pieces.

5380 PCGS 1847-C EF 45. Well struck with only minor surface abrasions and faint traces of luster remaining. A popular date because of its availability in VF and EF condition.

5381 PCGS 1861 EF 45. Light in color with numerous small bagging marks.

5382 PCGS 1873 AU 55. Open 3. Bright, semi-prooflike fields and well struck with clean surfaces overall. The Open 3 is the scarcer of the two varieties of this year and both are significantly more difficult than the combined mintage of 112,505 would indicate.

5383 NGC 1873 AU 58. Closed 3. Rare in AU with few auction appearances and only three pieces having been so graded by NGC (PCGS does not make the distinction between Open and Closed). This piece is almost fully struck and is missing just a little luster in the fields.

5384 ANACS 1878 EF 45. Well struck with light color.

5385 Hallmark 1878-S AU 58. A slightly scarcer date with almost complete mint luster.

5386 NGC 1879 MS 60. Fully struck but somewhat baggy. A better date With Motto five.

5387 ANACS 1879-S AU 55. Sharply struck with semi-prooflike fields.

5388 PCGS 1882 MS 63. Orange-gold centers that deepens considerably in hue toward the edges.

5389 PCGS 1883-S EF 45. Rich orange-gold color. Scarce date.

5390 ANACS 1884-S AU 50. Original surfaces. A moderately scarce date.

5391 PCGS 1888-S EF 45. A surprisingly difficult date when one considers the rather large mintage. Deep orange color.

5392 ANACS 1888-S EF 45. A well struck, original example of this slightly scarcer date.

5393 PCGS 1888-S AU 50. Sharply struck with good remaining luster. Scarce in strict AU with only nine having been certified as such.

5394 PCGS 1891 MS 60. Fully struck and fully lustrous. Scarcer date.

5395 PCGS 1891-CC AU 55. Lightly marked, missing just a bit of luster from the fields.

5396 ANACS 1893 MS 63. Fully struck with rich reddish-pink color.

5397 NGC 1893-CC MS 61. An especially pleasing example of this popular final year of issue with good luster and clean features.

5398 ANACS 1894-O EF 40. Clean fields with faint traces of luster remaining.

5399 PCGS 1894-O EF 45. Well struck with good color.

5400 PCGS 1894-O AU 55. A very scarce New Orleans five with bright, semi-prooflike fields and almost a full strike.

5401 ANACS 1894-O AU 55. A well struck, semi-prooflike example similar to the previous lot.

5402 ANACS 1894-S AU 55. A very scarce, late date S-mint five. Sharply struck with bright, semi-prooflike fields.

5403 PCGS 1895-S AU 50. Very scarce and underrated. A coin with deep orange-gold color and minimal marks for the grade.

5404 ANACS 1898-S MS 61. Fully struck with glittering, semi-prooflike fields.

5405 PCGS 1900 MS 63. Fully struck with deep reddish-pink luster.

5406 PCGS 1900-S MS 60. A much scarcer date than one might imagine from the mintage of 329,000. Only 22 coins have been graded in all conditions of mint state by PCGS.

5407 ANACS 1901-S MS 63. Well struck with excellent luster.

5408 NGC 1902 MS 62. Sharply struck.

The August 1991 Chicago Bullet Auction

- 5409 ANACS 1904 MS 63. Fully struck
- 5410 ANACS 1905 MS 63. Satiny.
- 5411 Hallmark 1905-S AU 55. Looks uncirculated with only the slightest friction in the fields.
- 5412 PCGS 1906 MS 61. Fully lustrous and sharply struck.
- 5413 NGC 1907-D MS 63. Good luster for the grade.

INDIAN HALF EAGLES

- 5414 PCGS 1909-D MS 62. Fully struck with much cleaner features than would be expected from the grade.
- 5415 ANACS 1910-S AU 58. A scarce coin in mint state. This piece has good color and minimal marks with just a touch of friction on the highpoints.
- 5416 NGC 1913 MS 60. Sharply struck and fully lustrous.
- 5417 PCGS 1913 MS 61. Good luster and color with minimal abrasions for the grade.
- 5418 PCGS 1913-S EF 45. Reddish-orange color with a few bagmarks.
- 5419 ANACS 1915-S EF 45. Even wear on the high points with no noticeable field marks.
- 5420 ANACS 1915-S AU 58. A somewhat scarcer issue with bright surfaces and clean fields.

EARLY EAGLES

- 5421 PCGS 1804 VF 35. A rare date among the early eagles with an original mintage of only 3,757 pieces. Characteristically for this date the facial features of Liberty are ill-defined and likewise the eagle is soft in the center. There are a few light, parallel adjustment marks in the center of the obverse but the fields are unusually free from contact. A mid-range, and therefore more affordable, example of this rare date.

LIBERTY EAGLES

- 5422 PCGS 1846 VF 30. A very scarce and underrated Coronet ten that is usually not available in any condition. PCGS has only certified 14 in all grades, none in AU or mint state. This piece has good details while the surfaces are peppered with numerous tiny abrasions, none of which are large or distracting.
- 5423 ANACS 1847-O EF 45. Clean, semi-reflective fields. A common O-mint No Motto ten.
- 5424 ANACS 1848 EF 40. Relatively clean surfaces with light reddish patina around the devices. Slightly better date.
- 5425 NGC 1849 MS 63. Mint state gold struck prior to the Civil War, regardless of denomination, is of the greatest rarity. Mint state No Motto tens are so rare that one could not even put together a date set, given unlimited funds and time. However, once in a while a single piece will come onto the market. These coins are eagerly bought by those collectors seeking to assemble mint state type sets. As a date 1849 is not especially rare in circulated grades, but naturally it is all but unthinkable in mint condition. This is one of only three pieces NGC has certified in mint state. (PCGS has certified six with the finest being a 62). This coin is tied for finest graded to date with one other MS-63 (possibly a re Submission of this piece?). Well struck, the fields are bright and fully lustrous, and there are no

abrasions of any consequence. The fields show diagonal die striations indicating the planchet was struck from polished dies (thus explaining the brightness in the fields). An unimprovable example of this early date and one of the finest known No Motto tens of any date.

- 5426 ANACS 1850 EF 45. Large Date. A moderately scarcer issue. This piece has light reddish color in the fields and is sharply struck with no distracting marks.
- 5427 PCGS 1852 EF 40. An affordable, common date No Motto ten with a few stray field marks and tiny bits of luster remaining around the outer devices.
- 5428 ANACS 1855 AU 50. A scarcer No Motto P-mint ten and one usually not seen in AU. Lustrous and lightly marked.
- 5429 ANACS 1856 EF 45. A better date that is very elusive any finer than this piece. Somewhat baggy on the obverse.
- 5430 PCGS 1867 EF 40. An exceedingly scarce With Motto ten that is even rarer than its mintage of 3,140 would indicate. Most survivors are in the VF-EF range and only a couple are known in AU, apparently none exist in mint state. This piece shows scattered light abrasions in the fields with traces of luster still to be seen around the devices.
- 5431 PCGS 1868 VF 25. Although a scarce issue, the 1868 does not compare to its predecessor from the Philadelphia mint, the 1867. Both issues are, however, scarce in high grade with no mint state coins known. This is an original coin with medium golden-orange color, even wear, and a few light, scattered abrasions.
- 5432 ANACS 1874 EF 45. Bits of pinkish tinged luster still cling to the devices of this better date With Motto ten.
- 5433 PCGS 1874-CC VG 10. Although heavily worn the design is still clearly discernable and there are no large or objectionable marks. Scarce.
- 5434 PCGS 1877 EF 45. Perhaps the mintage of this legendary issue speaks most eloquently about its rarity: 817. The 1877 has one of the lowest mintages in the entire series of No Motto tens and is certainly one of the most highly prized and sought after issues. In the 35-year survey of major gold auctions conducted by David Akers he could only trace 30 appearances at public auction. To date (7/90) the combined number of coins certified by PCGS and NGC only totals eight pieces. Only two other coins have been graded higher (one PCGS AU and one NGC AU). This is a most pleasing, problem-free piece with glittering, prooflike fields, a firm strike, and no distracting marks, and is of sufficient quality that one need never upgrade it.
- 5435 ANACS 1878 AU 55. Uncommonly difficult for what is considered to be a common date. Well struck with almost full luster in the fields.
- 5436 ANACS 1878 AU 55. A slightly better date that is generally well struck and retaining much of the original mint luster.
- 5437 ANACS 1879-S AU 55. A scarcer coin in high grades. This piece being very lustrous and well struck with a streak of russet patina on each side.
- 5438 PCGS 1883 MS 60. Moderately scarce. Good luster and attractive for the grade.
- 5439 NGC 1884-S AU 50. Lightly abraded with deep orange patina. Quite a scarce issue among the later date Coronet tens.
- 5440 ANACS 1887-S MS 60. Sharply struck with pretty luster that is pink in the centers and turns a light green at the edges.
- 5441 ANACS 1888 AU 55. Lightly abraded.

The August 1991 Chicago Bullet Auction

Specially Prepared for
Charles D. Moore

- 5442 PCGS 1891-CC EF 45. Sharply struck with bright yellow-gold color.
- 5443 NGC 1891-CC AU 50. Well struck with the usual reddish color around the devices.
- 5444 PCGS 1891-CC AU 55. Almost complete mint luster with a couple of small grease stains (as struck).
- 5445 PCGS 1891-CC MS 60. Fully struck with flashy mint luster. A common date CC date and good for type purposes.
- 5446 PCGS 1891-CC MS 61. Exceptionally lustrous and well struck but held back from a higher grade by a number of small bagmarks.
- 5447 ANACS 1894-S AU 58. A rare late date S-mint Coronet ten that is seldom available in this or any other grade. Sharp, pinpoint detailing throughout with almost complete luster, the fields do show a number of marks, apparently from contact with other coins.
- 5448 ANACS 1895-S EF 40. David Akers writes of this date, "I cannot think of a more underrated date in the Eagle series, or in any other series of U.S. coins for that matter, than the 1895-S." An original coin with an outline of deep red patina around the devices with few distracting marks.
- 5449 ANACS 1896-S EF 45. Another scarce and overlooked S-mint issue. Bright and well detailed.
- 5450 ANACS 1896-S AU 50. Very clean fields with considerable luster remaining.
- 5451 ANACS 1897-S AU 50. Bright yellow-gold color. Scarce in AU and Unc.
- 5452 PCGS 1897-S AU 58. Sharply struck with a very pronounced reddish-coppery tint. Somewhat scarce, but not as scarce as previous S-mints.
- 5453 ANACS 1898-S AU 55. Good luster and a strong strike. Scarce above EF.
- 5454 ANACS 1901 MS 63. Fully struck with thick, frosty mint luster.
- 5455 NGC 1902-S MS 64. A lovely mint state type coin with superb luster, a sharp strike, and minimal abrasions.
- 5456 ANACS 1903-S AU 58. Fully struck and very close to mint state.
- 5457 ANACS 1904 MS 62. Fully struck with a few small marks in the fields to keep it from grading higher.
- 5458 ANACS 1905-S AU 50. Considerably scarcer than the mintage would indicate. Sharply struck and semi-prooflike.
- 5459 ANACS 1905-S AU 55. A much scarcer date than its mintage of 369,250 would indicate. Seldom seen above VF. Well struck with bright pink and orange luster.
- 5460 PCGS 1907-S AU 58. A very scarce and underrated coin in high grades, being especially elusive in mint state. This piece has full mint luster with only the slightest friction noted in the fields. Fully struck.

INDIAN EAGLES

- 5461 ANACS 1908 No Motto MS 61. A trifle baggy but fully lustrous and mint state.
- 5462 NGC 1908-S AU 53. A rare coin in full mint state and therefore a good value for the collector in problem-free AU as is this coin. Well struck with rich reddish color and minimal abrasions for the grade.

- 5463 PCGS 1911-D AU 50. A rare ten Indian with an original mintage of only 30,100 pieces. Seldom seen in mint condition. This piece has attractive color and is almost completely free from marks.
- 5464 PCGS 1912-S MS 61. Fully lustrous with an above average strike for this difficult and poorly produced issue.
- 5465 NGC 1912-S MS 63. A well struck coin for this usually poorly produced issue. Although the feather detail is not complete, it is well defined except at the very top of the eagle's wing. Frosty, granular surfaces as usual with a few small marks as indicated by the grade. One of only five pieces to have been so graded by NGC. Few have been graded higher by either service.
- 5466 ANACS 1913-S EF 45. Evenly worn with good remaining design details on this scarce S-mint.
- 5467 ANACS 1913-S AU 50. A very scarce, low mintage issue that is most difficult (and expensive) in mint state. This piece is sharply struck on the obverse (weaker on the back) with good reddish color.
- 5468 NGC 1932 MS 62. Well struck with good color and no large marks.
- 5469 ANACS 1932 MS 64. Well struck with scintillating red and olive tinted luster.

LIBERTY DOUBLE EAGLES

- 5470 ANACS 1852 AU 50. A clean, original, and affordable Type One twenty.
- 5471 ANACS 1854 EF 45. Good remaining luster that has taken on a distinctive reddish tint.
- 5472 ANACS 1857-S AU 50. Very well struck with surprisingly clean surfaces for the grade.
- 5473 PCGS 1859 EF 40. The 1859 is one of the rarest issues in the entire series of Coronet twenties both from the standpoint of overall rarity and condition rarity. There are perhaps only 20 or so business strikes known in all grades with only a handful of AU and mint state coins. This piece has light red and steel-blue color accents in the fields with a few small, scattered marks. A thoroughly presentable example of this rare and undervalued issue.
- 5474 PCGS 1860-O EF 40. A rare, low mintage date with an original production of only 6,600 pieces. Of that number only a handful survive today with perhaps only one mint state coin in existence. To date (7/91) only two pieces have been graded higher by PCGS, both are EF 45. Admittedly others exist in AU and have yet to be graded by the services, but this coin is still tied with several others at the lower range of the condition census. The surfaces are original and show a deep red patina around the devices with very few abrasions in evidence. The first four stars are weak as is characteristic (if not diagnostic) for the issue.
- 5475 ANACS 1860-S AU 55. A very scarce issue and one that is a condition rarity as well. There have only been two mint state coins graded of this elusive issue, placing this coin just within the lower range of the condition census. Semi-reflective fields with bright orange tinted luster and surfaces that show no obvious or detracting marks.
- 5476 ANACS 1861 AU 50. Clean and sharply struck with deep red encrustations around the reverse devices.
- 5477 ANACS 1864-S EF 40. Much scarcer than its mintage of 793,660 would indicate, and seldom seen any finer than EF. This piece is certainly original, showing darker reddish-gray color on each side, being especially pronounced around the devices.

The August 1991 Chicago Bullet Auction

5478 ANACS 1864-S EF 40. A bit better detailed in certain areas than the coin above, but this is offset by a few more abrasions than that coin.

5479 PCGS 1866-S No Motto VF 35. The 1866-S No Motto is among the rarest of all Coronet twenties in high grade. No mint state coins are known and the finest coin graded so far by PCGS has been an AU 50. Abrasions are usually a problem with this issue and although there are numerous small marks on this coin, none are particularly large or distracting. Well struck with traces of luster remaining in the more protected areas (especially the reverse) and a light reddish patina in the fields.

5480 ANACS 1866-S Motto EF 40. Clean surfaces but showing localized striking weakness at the juncture of the shield, wing, and ribbon on the left side of the reverse. A scarce S-mint twenty that is represented in this auction by three pieces.

5481 PCGS 1866-S Motto EF 45. Although not quite as rare as the No Motto issue, the With Motto coins are nevertheless scarce, being especially difficult to find any finer than EF. This piece has orange tinted devices with ample portions of luster in the fields and more protected areas.

5482 NGC 1866-S Motto EF 45. This piece has bright yellow-gold surfaces with considerable luster remaining in the fields and differs from the previous coin by the presence of a long, curving die crack among the upper stars on the obverse. A rare opportunity to select between three examples of this difficult date.

5483 ANACS 1867-S AU 50. It is most unusual to find two examples of this rare date in the same auction, both in AU condition. This piece has good luster remaining in the fields with slight friction noted on the highpoints of the design and a few marks on the cheek of Liberty. Close to condition census for this elusive issue.

5484 PCGS 1867-S AU 55. A very scarce date, being especially elusive above EF. This piece is among the finest ten or so coins of this difficult issue. Well struck with excellent luster, there are a couple of bagmarks on the cheek and minor grease stains (as struck) in front of the coronet.

5485 PCGS 1868 AU 55. Another scarce P-mint that is virtually unknown in mint state with only one having been graded (and that a MS-60). Attractive, semi-prooflike fields with almost as much flash as a mint state coin.

5486 PCGS 1869 AU 50. A scarce date that is usually not seen any finer than EF. Prooflike reflectivity in the fields with the coin overall being a deep reddish-orange hue.

5487 ANACS 1870 EF 45. A scarce Type Two with noticeable portions of luster remaining in the field on the reverse. A clean coin with bright yellow-gold color.

5488 ANACS 1870-S EF 45. A clean, original example of this somewhat scarcer date that shows deeper red and gray color on and around the devices.

5489 ANACS 1870-S AU 50. Well struck with semi-reflective fields and a few abrasions. Seldom seen above AU condition.

5490 PCGS 1871 EF 45. A rare, low mintage issue with an original mintage of only 80,150 pieces. Akers compares the 1871 to dates such as the 1862 and 1868, it being just a bit less rare than the 1859. This lovely coin has deeply reflective prooflike fields with only minor marks on each side to disturb the flash of the mirrors. Very sharply struck as well.

5491 NGC 1871-S AU 50. A strictly graded AU 50 with good luster and bright, yellow-gold color. Scarce.

5492 ANACS 1872-S AU 50. Semi-prooflike fields with bright orange and pink patina.

5493 ANACS 1873-S Open 3 AU 50. Good luster for the grade.

5494 PCGS 1873-S Open 3 MS 60. Thick mint frost that has taken on a deep pink tone and is relatively undisturbed by coin to coin contact. The Open 3 is the scarcer of the two varieties of this issue.

5495 ANACS 1874-S MS 60. Although considered a common date with its mintage of 1.2 million, the 1874-S is actually quite scarce in mint state. This piece is fully lustrous with bright pink color and a few scattered, light marks.

5496 NGC 1876-CC AU 53. Lustrous and lightly marked. An affordable CC type coin.

5497 PCGS 1878-S MS 60. Baggy but fully uncirculated.

5498 PCGS 1879 AU 58. A scarcer date than one would imagine from just looking at the mintage of 207,630 pieces. Retaining almost full mint state luster, the edges are outlined with thin bands of rainbow iridescence. A lovely, original example of this elusive Philadelphia issue.

5499 PCGS 1880 VF 30. A scarcely seen twenty despite its mintage of 51,456 pieces. This is an original coin with deep russet patination surrounding the devices.

5500 PCGS 1880 AU 50. A difficult coin to locate in high grade, this is an especially choice specimen with very clean surfaces for the grade and attractive reddish-pink color. Sharply struck also.

5501 PCGS 1880-S AU 53. Excellent luster with scattered, small marks.

5502 NGC 1880-S AU 53. A scarce and underappreciated date. Sharply struck with bright surfaces.

5503 ANACS 1882-S AU 58. Fully struck and semi-prooflike with almost complete mint luster. Sharp coin.

5504 ANACS 1882-S AU 58. Fully struck with deep orange-red color.

5505 ANACS 1888 AU 55. A clean coin with only a bit of luster missing from the fields.

5506 ANACS 1888 MS 60. Fully lustrous and sharply struck but baggy as the grade would indicate.

5507 ANACS 1889 AU 58. A scarce and popular issue because of the low mintage of only 44,111 coins. Sharply struck and lightly abraded with good color and luster.

5508 ANACS 1890 AU 58. A scarce coin in any grade, this slider piece represents an excellent value with most of the eye appeal of a fully uncirculated coin at a substantial savings.

5509 PCGS 1897 MS 62. Fully struck with thick luster.

5510 PCGS 1897 MS 63. Sharply struck with orange and pink colored luster. Only 31 pieces have been so graded (7.91).

5511 ANACS 1897 MS 63. Fully struck with outstanding luster.

5512 ANACS 1898-S MS 63. Superb luster with minimal abrasions for the grade.

5513 NGC 1899 MS 63. Bright, coruscating luster with surprisingly clean surfaces.

5514 ANACS 1899 MS 63. Lustrous and attractive.

SAINT-GAUDENS DOUBLE EAGLES

5515 PCGS 1907 High Relief MS 65. Flat Rim. Inspired by the high relief coinage of Alexandrian and Hellenistic Greece, Augustus Saint-Gaudens sought to emulate the

The August 1991 Chicago Bullet Auction

windswept transparency of the Nike of Samothrace on his design for the double eagle of 1907. This magnificent coin has the full three-dimensional quality that Saint-Gaudens sought--each fold in Liberty's drapery is crisply defined and the devices are set against the smooth, unblemished fields. The luster sparkles and the coin overall is an originally preserved example of this magnificently designed and executed coin. One of only 43 gems to have been graded by PCGS according to the July Population Report.

- 5516 ANACS 1908 No Motto MS 63. Fully struck.
- 5517 ANACS 1908 No Motto MS 64. Lustrous with a fine, matte-like surface.
- 5518 ANACS 1908 No Motto MS 65. An outstanding example of this two year type.
- 5519 PCGS 1909-S MS 63. Lustrous with only minor abrasions.
- 5520 PCGS 1911-D MS 63. Full strike.
- 5521 ANACS 1911-D MS 65. Satiny luster with the usual matte-like textured surfaces.
- 5522 PCGS 1914-D MS 63. A clean, upper-end coin.
- 5523 PCGS 1914-D MS 63. Fully struck with pink centers surrounded by orange at the edges.
- 5524 PCGS 1914-D MS 63. Fully struck with a few field marks.
- 5525 NGC 1914-D MS 63. A sharp, upper-end coin with matte-like surfaces and attractive color.
- 5526 ANACS 1914-S MS 64. Sharply struck, the reverse is of full gem status.
- 5527 ANACS 1915-S MS 64. Sharply struck and satiny.
- 5528 PCGS 1920 MS 63. Considerably scarcer than other P-mints in the 1920s with only 81 having been graded to date (7.91).
- 5529 ANACS 1922-S MS 60.
- 5530 PCGS 1922-S MS 63. Bright, shimmering luster.
- 5531 PCGS 1922-S MS 63. Well struck with attractive pink luster that shows greenish overtones.
- 5532 ANACS 1924 MS 65. A stunning gem twenty with bright, lustrous fields and almost flawless devices. Strong eye appeal.
- 5533 PCGS 1925 MS 66. Full, crisp strike with attractive pink and orange tinted mint frost. A lovely example of this beautifully designed coin.
- 5534 ANACS 1927 MS 65. Bright pink and orange tinted surfaces. Very flashy.
- 5535 PCGS 1927-S MS 60. One of the legendary "stoppers" in the assembling of a mint state collection of twenty Saints. Over the years a few coins have trickled out of Europe but this has not appreciably altered the overall rarity of this issue. Only one other MS-60 coin has been certified by PCGS while a grand total of eight have been graded, none finer than MS-62. This piece has full frosty mint luster and a pronounced reddish color but none of the often seen copper stains common to this issue.
- 5536 ANACS 1928 MS 64. Full strike.
- 5537 ANACS 1928 MS 64. Excellent luster.

COMMEMORATIVE SILVER

- 5538 ANACS 1893 Isabella Quarter MS 62. Light silvery-gray

color with light color around the peripheral devices.

- 5539 NGC 1893 Isabella Quarter MS 63. Very sharply struck with good luster and pale patina.
- 5540 PCGS 1921 Alabama MS 63. Lustrous and lightly toned.
- 5541 PCGS 1921 Alabama MS 64. Exceptionally lustrous with clean features and light, even gray toning.
- 5542 NGC 1921 Alabama 2x2 MS 64. Much cleaner on the faces of Bibb and Kilby than usually seen. Attractive gray-olive toning.
- 5543 PCGS 1936 Albany MS 65. An original coin with light speckled toning over both sides.
- 5544 NGC 1936 Albany MS 65. Light, original toning with excellent underlying luster.
- 5545 PCGS 1937 Antietam MS 66. Pristine surfaces with smooth, satiny luster.
- 5546 PCGS 1937 Antietam MS 66. Attractive golden-rose toning.
- 5547 PCGS 1935-S Arkansas MS 64. Gray, olive, and rose iridescent toning.
- 5548 PCGS 1936-S Bay Bridge MS 65. Original mottled toning with thick underlying mint frost.
- 5549 NGC 1936-S Bay Bridge MS 65. An outstanding example of this well designed commemorative. There is only one small mark on the bear and the coin overall is covered with an original layer of golden patina with just a hint of olive.
- 5550 NGC 1935 Boone MS 66. Deep rainbow iridescent toning gives this coin an eye appeal not seen on most Boones. A coin that must be seen to be fully appreciated.
- 5551 NGC 1935-34 Boone MS 65. Lightly toned.
- 5552 PCGS 1937 Boone MS 65. Golden, rose, and olive iridescent toning.
- 5553 PCGS 1938-S Boone MS 64. Light in color.
- 5554 PCGS 1925-S California MS 66. The first in a run of four superb MS 66 California Jubilee halves. This is a most unusual offering of this scarce commemorative, and an opportunity not likely to be repeated again in the near future. Each coin in this small hoard is a carbon copy of the next one--bright, flashy luster with no noticeable abrasions. This coin has thick mint luster and just a hint of light peripheral color.
- 5555 NGC 1925-S California MS 66. A second superb example of this scarce commemorative and the first of three NGC coins. Bright swirling mint luster and nearly mark-free surfaces.
- 5556 NGC 1925-S California MS 66. Dazzling mint luster with just a hint of light, hazy color around the edges.
- 5557 NGC 1925-S California MS 66. The fourth and final specimen in this unparalleled offering of this scarce and popular commemorative. Minimally abraded with flashy mint frost. As with the previous lot there is just the vaguest hint of light peripheral color.
- 5558 NGC 1936-S Cincinnati MS 65. An original coin with light toning.
- 5559 NGC 1936-D Columbia MS 66. Essentially perfect surfaces with pale lavender and lilac toning.
- 5560 PCGS 1892 Columbian MS 62. Brilliant.
- 5561 PCGS 1892 Columbian MS 62. Gray toning.

The August 1991 Chicago Bullet Auction

5562 NGC 1892 Columbian MS 64. Medium gray-brown toning with deeper russet and blue around the edges and thick underlying luster.

5563 NGC 1892 Columbian MS 64, and an 1893 Columbian MS 64. Both coins are identically toned with deep reddish-gray centers surrounded by royal blue at the edges. (Total: 2 coins)

5564 ANACS 1893 Columbian MS 62. Brilliant with a few light marks.

5565 PCGS 1893 Columbian MS 63. Fully struck and untoned.

5566 NGC 1893 Columbian MS 64. Highly lustrous with a touch of rainbow iridescence on the top of the reverse.

5567 NGC 1893 Columbian MS 64. An exceptionally clean coin for this normally heavily bookmarked issue. Excellent luster and covered by a fragile iridescent toning.

5568 PCGS 1893 Columbian MS 65. Toned a lovely golden in the center of each side with deep blue at the edges and superb underlying mint luster. Twice as scarce in gem condition as the 1892.

5569 NGC 1935 Connecticut MS 65. Original blazing luster.

5570 PCGS 1935 Connecticut MS 66. Another absolutely original commemorative, this one with hazy lilac and reddish-brown patina with a few darker speckles on the reverse.

5571 PCGS 1935 Connecticut MS 66. Light golden-olive toning with clean, virtually mark-free surfaces.

5572 PCGS 1936 Delaware MS 65. Light in color.

5573 PCGS 1936 Delaware MS 66. A superb, original coin with bright iridescent toning where the edges came in contact with the cardboard holder of issue.

5574 PCGS 1936 Elgin MS 65. Spotty russet toning on the obverse. Superb luster as usual.

5575 NGC 1936 Elgin MS 66. Just a touch of fragile iridescence around the edges of both sides with the usual booming mint frost.

5576 PCGS 1936 Gettysburg MS 65. An original coin with golden-russet patina around the edges, most likely created by years of being housed in an original cardboard holder of issue.

5577 NGC 1924 Huguenot MS 64. Untoned with excellent luster.

5578 PCGS 1925 Lexington MS 65. Light gray toning with an underlying hint of olive. Excellent luster.

5579 NGC 1925 Lexington MS 65. Medium gray-brown toning that deepens just a bit at the edges. An original coin that looks like it just came out of the wooden box of issue.

5580 PCGS 1920 Maine MS 65. Untoned with thick mint frost. Good eye appeal.

5581 PCGS 1920 Maine MS 65. Clean, problem-free surfaces with just a hint of light color around the edge of the obverse.

5582 PCGS 1920 Maine MS 65. A brilliant coin with outstanding, flashy mint luster.

5583 NGC 1920 Maine MS 65. From the number of Maines in this auction one could get the impression this is a common commemorative. Of course, nothing could be further from the truth. One consignor was an accumulator of this coin and consigned six pieces to this auction. This coin has deep golden-rose peripheral toning with almost clear centers.

5584 NGC 1920 Maine MS 65. Originally toned in shades of gray and golden-rose with scattered speckles of charcoal gray on

each side. A colorful Maine that shows almost no contact marks.

5585 NGC 1920 Maine MS 65. Most of this coin is untuned but where color shows it is in streaks and spots of deep russet and royal blue.

5586 NGC 1934 Maryland MS 65. Original surfaces with a purple color on both sides, accented by a pale olive in the fields.

5587 PCGS 1923-S Monroe MS 63. Lustrous with scattered light marks.

5588 PCGS 1923-S Monroe MS 64. Lightly toned with excellent luster.

5589 NGC 1923-S Monroe MS 64. An attractive, originally toned Monroe with the random, spotty patination often seen on these coins. Good luster.

5590 PCGS 1928 Oregon MS 65. Lightly toned with the usual strong mint luster.

5591 PCGS 1928 Oregon MS 66. Bright, sparkling luster and virtually no toning.

5592 PCGS 1933-D Oregon MS 65. Thick mint frost.

5593 PCGS 1933-D Oregon MS 65. Untoned and highly lustrous.

5594 PCGS 1934-D Oregon MS 65. Untoned and clean as a whistle. Scarcer issue in high grades.

5595 NGC 1936-S Oregon MS 66. Faint streaks of light golden-olive toning.

5596 PCGS 1937-D Oregon MS 66. Lustrous with a touch of light peripheral color.

5597 PCGS 1937-D Oregon MS 67. Nearly perfect surfaces with beautiful multi-colored toning that deepens toward the edges. Strong eye appeal.

5598 NGC 1939 Oregon MS 65. Gentle shadings of golden and green colors toward the edges.

5599 PCGS 1920 Pilgrim MS 65. An attractive, original coin that deserves a second look. The surfaces are highly lustrous as usual, and each side is covered with a deep, speckled iridescence. The surfaces appear flawless to the unaided eye.

5600 NGC 1920 Pilgrim MS 66. An originally toned example of this scarcer, early commemorative. The surfaces appear to be free from even the smallest imperfections and are accented by a subtle iridescent glow in the fields. Scarce so fine with only 17 pieces having been so graded by NGC.

5601 PCGS 1937 Roanoke MS 65. Lightly toned.

5602 NGC 1936 Robinson MS 65. Even gray toning with faint underlying pinkish hues.

5603 NGC 1926 Sesquicentennial MS 63. Lightly toned with a hint of rainbow coloring around the edge of the obverse.

5604 NGC 1926 Sesquicentennial MS 64. Light in color with minimal abrasions on the devices.

5605 NGC 1935 Spanish Trail MS 66. Light patina on each side with almost flawless fields—a very difficult commemorative to locate in such superior condition.

5606 NGC 1935 Spanish Trail MS 66. Deeper in color than the previous piece but seemingly just as free from abrasions. An original coin with strong eye appeal.

5607 PCGS 1925 Stone Mountain MS 64.

5608 PCGS 1925 Stone Mountain MS 64. Gray toning with

The August 1991 Chicago Bullet Auction

deeper russet around the devices.

- 5609 PCGS 1925 Stone Mountain MS 65. Pink and gray patination with strong underlying luster.
- 5610 PCGS 1935 Texas MS 66. Lovely deep iridescent green, blue, and golden-rose toning. Fully struck on the hand of Liberty.
- 5611 PCGS 1936-D Texas MS 66. Thick mint frost with fragile iridescent toning on the obverse.
- 5612 PCGS 1937-D Texas MS 66. Light peripheral toning.
- 5613 PCGS 1937-S Texas MS 66. Majestic blue and lavender toning.
- 5614 NGC 1938-S Texas MS 66. Breathtakingly lovely mottled iridescent toning. A must see coin.
- 5615 PCGS 1925 Vancouver MS 64. Light field marks with vague toning around the edges.
- 5616 PCGS 1946 Booker T. Washington MS 66. Magnificent iridescent toning.
- 5617 NGC 1948-S Booker T. Washington MS 65. Untoned and lustrous.
- 5618 PCGS 1952 Washington Carver MS 65. Deep lilac toning.
- 5619 PCGS 1936 York MS 65. Brilliant with the usual thick mint frost.

TERRITORIAL GOLD

- 5620 PCGS 1853 Assay Twenty AU 50. K-18. R.2. An especially sharp impression with fully struck central details on the arrows and shield. Original color remains over the surfaces with a significant portion of luster still showing. The only defect we note are a couple of minor digs on the reverse through RAN of FRANCISCO.
- 5621 PCGS 1853 Assay Twenty AU 50. K-18. R.2. One of the most attractive Assay twenties we have seen in some time. The fields have a semi-reflective quality that is most unusual on these pieces and the surfaces have taken on a light rose tint that is deeper in hue and more noticeable around the devices. Sharply struck also.
- 5622 PCGS 1853 Assay Twenty MS 61. K-18. R.2. An exceptionally well brought up Assay twenty with full arrow and shield detail in the center of the obverse. The Assay Office was the forerunner of the San Francisco mint and served as a mint in all but name to the citizens of California. The surfaces have a few small abrasions from coin to coin contact over the years, but the luster is complete, and the coin appears to be totally original. This is a significant 19th century gold coin and one that should be considered by all collectors of 19th century U.S. gold type. According to the July Population Report there have only been eleven coins that have been so graded, with only 41 certified in all conditions of mint state.
- 5623 PCGS 1850 Baldwin Five-Dollar VF 30. K-2. R.5. A rare and seldom encountered Territorial issue that was issued in large (more than a million pieces) quantities and circulated for a while at face value until an assay showed the coins, especially the larger denominations, to be light by 3% or so from the stated gold content. Shortly the public began to refuse them and it was only a matter of time until Mr. Baldwin booked passage on board the steamer Panama bound for the East Coast. Baldwin's coins were further discounted and eventually melted, thus accounting for the rarity and collectibility of these pieces today. This coin has a pleasing medium gold color and shows even wear with the normal amount of marks one would expect from a coin of this grade. A rare opportunity for the Territorial collector.

5624 PCGS 1855 Kellogg Twenty VF 30. K-3a. R.6. The surfaces have numerous small abrasions, evidently from years of use in Gold Rush California, but this evidence of usage does not obscure any of the design or significantly dilute the historical importance and desirability of this coin. Despite extensive commercial use there are still tiny portions of luster clinging to the protected areas of the devices and the design shows good detailing.

- 5625 PCGS 1849 Norris, Gregg, and Norris Five-Dollar VF 30. Reeded Edge. K-4. R.4. The Norris, Gregg, and Norris gold coins are among the most historically important and desirable of all U.S. gold coins. This firm was the first to issue private California gold coins in May, 1849, shortly after the discovery of gold at Sutter's Mill the previous year. This is an attractive coin although it 'only' grades VF 30. The obverse is especially choice for the grade with smooth, almost unblemished fields. The reverse is a bit rougher but the marks that are present on that side are certainly consistent with the grade. Even wear on the highpoints with a light green cast to the gold alloy. This is a relatively inexpensive example of this rare and important Territorial gold coin.

PATTERNS

- 5626 PCGS 1863 Half Dollar, Judd-343, R.7, PR 64 Red and Brown. The regular die for the 1863 obverse mated with the 1866 With Motto reverse. Struck in copper with reeded edge. Much original red color remains with light violet overtones.
- 5627 PCGS 1864 Quarter, Judd-387, R.7, PR 65 Brown. The regular dies piece differing only in the use of the scroll above the eagle with the motto as added in 1866. Struck in copper with a reeded edge. Deep blue overtones on the obverse with attractive reddish-brown on the reverse.

MISCELLANEOUS

- 5628 PCGS 1859-A Austria Thaler MS 61, toned; 1902 England Threepence MS 66, light rainbow iridescent toning; 1904 Hesse-Darmstadt Birthday 2 Mark PR 61, brilliant, and an 1826 Switzerland-Bern. Batz AU 58 light iridescence. (Total: 4 coins)
- 5629 PCGS 19th Century European, 1897 England Crown LXI Edge MS 62, brilliant; 1887-R Italy 2 Lira MS 62, edge toned; and an 1871 Netherlands 2 1/2 Gulden MS 61, golden and blue toning. (Total: 3 coins)
- 5630 PCGS 1871 Prince Edward Island one-cent MS 67 Red, a superb example with full red luster and rich coloration, only one tiny mark is visible high on Victoria's cheek; NGC 1910 Prussia three-marks PR 66, a beautiful, hairline-free example with deep mirrored fields that display just a hint of light toning; and a PCGS 1935 South Rhodesia six-pence MS 67, lightly toned and a superb example of this four year type pristine surfaces with outstanding luster. (Total: 3 coins)
- 5631 PCGS 1938 Canada Dollar MS 62. Brilliant with a few marks.
- 5632 PCGS 1951 Canada Dollar PL 67. Bright, flashy surfaces with a vague suggestion of light color around the edges.
- 5633 PCGS 1917-C Canada Sovereigns, Y-20. The coins grade MS60, MS61, and MS62. A decent representative group from an issue with a rather low original mintage of 58,845 pieces. (Total: 3 coins)
- 5634 PCGS Five (5) 1917-C Canada Sovereigns, all MS-61 with some luster. (Total: 5 coins)

The August 1991 Chicago Bullet Auction

- 5635 PCGS Five (5) 1917-C Canada Sovereigns MS 61. All are lustrous and show nice, old gold color. (Total: 5 coins)
- 5636 PCGS Five (5) 1917-C Canada Sovereigns MS 61. Lustrous. (Total: 5 coins)
- 5637 PCGS Five (5) 1917-C Canada Sovereigns MS 62. Good color and luster with some light bagmarks. (Total: 5 coins)
- 5638 PCGS Five (5) 1917-C Canada Sovereigns MS 62. All show good luster and decent color and are conservatively graded. (Total: 5 coins)
- 5639 PCGS Five (5) 1918-C Canada Sovereigns MS 61. KM-20. All Canadian mintmarked sovereigns are sought after and this is a more obtainable date. Lustrous. (Total: 5 coins)
- 5640 PCGS Five (5) 1918-C Canada Sovereigns MS 62. Decent luster and color, displaying some light bagmarks. (Total: 5 coins)
- 5641 PCGS Three (3) 1919-C Canada Sovereigns MS 61. Y-20. Final year of issue of this popular type. Nicely struck coins with good color and luster, several bagmarks. (Total: 3 coins)
- 5642 PCGS Four (4) 1919-C Canada Sovereigns MS 62. Lustrous. (Total: 4 coins)
- 5643 PCGS Five (5) 1919-C Canada Sovereigns MS 62. Lustrous. (Total: 5 coins)
- 5644 NGC 1937 Canada Six-Piece Specimen Set. The cent grades Matte Specimen 65 Red; the five-cent is Matte Specimen 65, brilliant; the ten-cent is MS 65, toned; the twenty-five cent is Matte Specimen 65, toned; the fifty-cent is Matte Specimen 66, toned; and the dollar is Matte Specimen 66, toned. (Total: 6 coins)
- 5645 PCGS 1901 A Germany 50 Pfennig PR 67. KM-15. A superb, deeply mirrored example with pristine surfaces and frosty devices. So far this is the only coin graded for this category and it is unlikely ever to be bettered.
- 5646 PCGS 1902-F Germany 50 Pfennig PR 66. Brilliant, unmarked surfaces with good reflectivity. As the preceding lot this is the only coin graded in its category and is most attractive.
- 5647 PCGS 1883 Hawaii Quarter MS 62. Mostly brilliant with just a touch of light golden color.
- 5648 PCGS 1915 (T4) Japan 10 Sen MS 66. Brilliant with superb mint frost.
- 5649 PCGS 1871 (M4) Japan 20 Sen MS 62. Y-24. A better earlier type.
- 5650 PCGS 1870 (M3) Japan Yen MS 63. Type One. Y-5. A scarce earlier issue, one of three varieties of this one year type, good luster with minimal surface damage.
- 5651 PCGS 1905 (M38) Japan Yen MS 62. Y-A25.2, a popular type that displays much attractive luster and quite clean surfaces; and a 1914 (T3) Yen MS 63. Y-38, a one year type with superb vibrant luster, a few pin-prick marks, and a couple of carbon spots on the reverse. (Total: 2 coins)
- 5652 PCGS 1899 Go. R Mexico One-Peso MS 64. Fully struck with glittering, prooflike fields.
- 5653 NGC Netherlands 10 Gulden: 1875; (2) 1876; 1877; and an 1879; all MS 64 with nice luster and attractive surfaces. (Total: 5 coins)
- 5654 NGC (2) 1885 Netherlands 10 Gulden MS 64, crisply struck, one with semi P-L surfaces, both lustrous; and an 1887 10 Gulden MS 64, old gold color with minor bagmarks in the fields. (Total: 3 coins)
- 5655 NGC Two (2) 1889 Netherlands 10 Gulden MS 65, KM-106, Y-A16, good clean fields with full luster and brilliance. (Total: 2 coins)
- 5656 NGC 1912 Netherlands 10 Gulden MS 65. Fully struck with deep reddish-gold color.
- 5657 NGC 1913 Netherlands 10 Gulden MS 65. Lustrous.
- 5658 PCGS 1936 Philippine Commonwealth 50 Centavos. Four (4) MS 62, one of which is toned; three (3) MS 63, uniformly lustrous and brilliant; and one (1) MS 64, an originally toned piece. (Total: 8 coins)
- 5659 PCGS 1936 Philippine Commonwealth One Pesos. Three (3) stairstepped pesos that grade MS 61, MS 62, and MS 63. Lustrous pieces, only the MS 61 is toned. (Total: 3 coins)
- 5660 PCGS 1936 Philippine Commonwealth Pesos. Five (5) MS 64 examples of this popular commemorative peso. All are untuned and show good luster. (Total: 5 coins)
- 5661 PCGS 1936 Philippine Commonwealth Peso MS 65. Light golden toning with smooth, lustrous surfaces. One of only six to have been so graded by PCGS.
- 5662 PCGS 1936 Philippine Commonwealth Peso MS 66. An outstanding example of this popular peso that features the combined busts of Presidents Roosevelt and Quezon. Mostly brilliant still with a touch of pale lilac patina on the devices.
- 5663 PCGS 1871-B Switzerland 10 Rappen MS 65. Fully struck with prooflike fields, and light color.
- 5664 PCGS 1947-B Switzerland One Francs. KM-21. One (1) MS 65 and three (3) MS 66, full luster and brilliance. (Total: 4 coins)
- 5665 PCGS Two (2) 1947-B Switzerland One Francs MS-67. Both are superb, fully struck examples displaying superior luster and brilliance with pristine surfaces. (Total: 2 coins)
- 5666 PCGS Two (2) 1947-B Switzerland One Francs MS-67. Both with superb, top quality luster and immaculate surfaces. (Total: 2 coins)
- 5667 PCGS 1947-B Switzerland 2 Francs MS 66. Lustrous centers and nicely toned perimeters, virtually unmarked surfaces.
- 5668 PCGS 1923-B Switzerland 5 Francs MS 63. KM-37. A two year type and quite scarce, seen here with attractive cartwheel luster and very clean fields. Nice quality for the grade.
- 5669 PCGS 1933-B Switzerland Five Francs KM-40 MS 62; 1953-B Five Francs MS 64; and a 1967-B Five Francs MS 63. (Total: 3 coins)
- 5670 NGC 1949 Switzerland 20 Francs MS 64, lustrous; 1949 Switzerland 20 Francs MS 65, a pristine gem; and a 1925 Great Britain Sovereign MS 65, with just a touch of olive color. (Total: 3 coins)
